SUBJECT INDEX TO VOLUME 69, 1990

Explanation of Symbols:

The page number on which an article begins is listed at the end of that article's title. An article may appear under more than one heading.

Author names are listed alphabetically. Numbers listed after each name are the page numbers of the article(s) on which their name appears.

Page numbers followed by # represent presentations at the International Symposium on Fluorides: Mechanisms of Action and Recommendations for Use. Page numbers followed by @ indicate papers presented at the Symposium on "Root Surface Caries". Page numbers followed by * represent papers from the Symposium on "Plaque Fluid: Biochemistry and Properties of the Plaque/Enamel Interface". Page numbers followed by ! are Guest Editorials.

ABSORPTIOMETRY, PHOTON

Root hard-tissue demineralization rate measured by ^{125}I absorptiometry: comparison with lesion-depth measurements. Almqvist, H., *et al.*, 1519

ABSTRACTS

Abstracts, IADR/AADR, 100-386
Divisional abstracts, 918-1108
Editorial: should 75% of IADR abstracts be rejected? Dawes, C., 1544!
Survey of the publication history of randomly selected IADR/AADR abstracts presented in 1983 and 1984, A. Corry, A.M., 1453

ACID-BASE IMBALANCE

Environmental and physiological factors affecting dental fluorosis. Angmar-Månsson, B. and Whitford, G.M., 706#

ACID ETCHING, DENTAL

Preliminary surface analysis of etched, bleached, and normal bovine enamel. Ruse, N.D., *et al.*, 1610
Scanning electron microscopic investigation of bonding of methacryloyloxyalkyl hydrogen maleate to etched dentin, A. Fukushima, T. and Horibe, T., 46

ACID PHOSPHATASE

Evidence for uptake of basement membrane by differentiating ameloblasts in the rat incisor enamel organ. Sawada, T., 1508

ACIDS

Biochemical mechanisms of enhanced inhibition of fluoride on the anaerobic sugar metabolism by *Streptococcus sanguis*. Hata, S., *et al.*, 1244
Diminished acid tolerance of plaque bacteria caused by fluoride. Marquis, R.E., 672#

ACIDULATED PHOSPHATE FLUORIDE

Assessment of loosely-bound and firmly-bound fluoride uptake by tooth enamel from topically applied fluoride treatments. Sieck, B., *et al.*, 1261

ACTINOBACILLUS

Preferential adsorption of human neutrophil myeloperoxidase isoform III by oral bacteria. Miyasaki, K.T., 1780
Serum antibody response to antigens of oral gram-negative bacteria by cats with plasma cell gingivitis-pharyngitis. Sims, T.J., *et al.*, 877

ACTINOMYCES

Association of the microbial flora of dental plaque and saliva with human root-surface caries. Van Houte, J., *et al.*, 1463
Comparative microbiological and immunological studies of subgingival dental plaque from man and baboons. McMahon, K.T., *et al.*, 55
Diminished acid tolerance of plaque bacteria caused by fluoride. Marquis, R.E., 672#
Effects of sucralose on coronal and root-surface caries. Bowen, W.H., *et al.*, 1485
Influence of sucralose on bacterial metabolism, The. Young, D.A. and Bowen, W.H., 1480
Microbiology of root surface caries in humans. Bowden, G.H.W., 1205@

ADRENERGIC RECEPTOR AGONISTS

Changes in protein secretion by rat submandibular glands in response to isoproterenol, α-methylnoradrenaline, and clonidine during post-natal development. Tanaka, E., *et al.*, 60

AGED

Characteristics of mandibular masticatory movement in young and elderly dentate subjects. Karlsson, S. and Carlsson, G.E., 473

ALCOHOL, ETHYL

Influence of chronic ethanol exposure on nitrous oxide analgesia in mice. Henry, R.J., *et al.*, 1674

ALKALINE PHOSPHATASE

Properties of alkaline phosphatase of the human dental pulp. Goseki, M., *et al.*, 909

ALPHA-AMYLASE

Characterization of the α-amylase receptor of *Streptococcus gordonii* NCTC 7868. Douglas, C.W.I., 1746

ALVEOLAR BONE

Alveolar bone loss of senescence-accelerated mouse (SAM). Sashima, M., *et al.*, 82
Biochemical and immunohistochemical study of the proteoglycans of alveolar bone, A. Bartold, P.M., 7
Evaluation of alveolar bone in relation to nutritional status during pregnancy. Clark, D.E., *et al.*, 890

AMELOBLASTS

Evidence for uptake of basement membrane by differentiating ameloblasts in the rat incisor enamel organ. Sawada, T., 1508

AMES SALMONELLA/MICROSOME TEST

Evaluation of mutagenicity of restorative dental materials using the Ames Salmonella/microsome test. Li, Y., *et al.*, 1188

AMINES

Amine-induced polymerization of aqueous HEMA/Aldehyde during action as a dentin bonding agent. Munksgaard, E.D., 1236

AMINO ACIDS

Amine-induced polymerization of aqueous HEMA/Aldehyde during action as a dentin bonding agent. Munksgaard, E.D., 1236

AMOXYCILLIN

Bacteremia in children following dental extraction. Coulter, W.A., *et al.*, 1691

AMYLASES

Effects of diabetes and insulin on α-amylase messenger RNA levels in rat parotid glands. Kim, S.K., *et al.*, 1500

ANALGESIA

Influence of chronic ethanol exposure on nitrous oxide analgesia in mice. Henry, R.J., *et al.*, 1674

ANEMIA, HEMOLYTIC

Depressed eruption rate of the rat maxillary incisor in a drug-induced uncompensated hemolytic state model. Giglio, M.J., *et al.*, 906

ANEUPLOIDY

Taurodontism in 45,x females. Varrela, J., *et al.*, 494

ANIMAL WELFARE

Apathy. Bowen, W.H., 1350
Guest editorial: the animal rights war on biomedical research: a call to arms. Gibson, W.A., 1703!

ANTIVIRAL AGENTS

In vitro virucidal effectiveness of a 0.12%-chlorhexidine gluconate mouthrinse. Bernstein, D., *et al.*, 874

ANTHROPOLOGY, PHYSICAL

Prevalence and pattern of distribution of root

SUBJECT INDEX TO VOLUME 69, 1990

Explanation of Symbols:

Effects of sucralose on coronal and root-surface caries. Bowen, W.H., *et al.*, 1485
Influence of sucralose on bacterial metabolism, The. Young, D.A. and Bowen, W.H., 1480
Microbiology of root surface caries in humans. Bowden, G.H.W., 1205@

ADRENERGIC RECEPTOR AGONISTS

Changes in protein secretion by rat submandibular glands in response to isoproterenol, α-methylnoradrenaline, and clonidine during post-natal development. Tanaka, E., *et al.*, 60

AGED

Characteristics of mandibular masticatory movement in young and elderly dentate subjects. Karlsson, S. and Carlsson, G.E., 473

ALCOHOL, ETHYL

Influence of chronic ethanol exposure on nitrous oxide analgesia in mice. Henry, R.J., *et al.*, 1674

ALKALINE PHOSPHATASE

Properties of alkaline phosphatase of the human dental pulp. Goseki, M., *et al.*, 909

ALPHA-AMYLASE

Characterization of the α-amylase receptor of *Streptococcus gordonii* NCTC 7868. Douglas, C.W.I., 1746

ALVEOLAR BONE

Alveolar bone loss of senescence-accelerated mouse (SAM). Sashima, M., *et al.*, 82
Biochemical and immunohistochemical study of the proteoglycans of alveolar bone, A. Bartold, P.M., 7
Evaluation of alveolar bone in relation to nutritional status during pregnancy. Clark, D.E., *et al.*, 890

AMELOBLASTS

Evidence for uptake of basement membrane by differentiating ameloblasts in the rat incisor enamel organ. Sawada, T., 1508

AMES SALMONELLA/MICROSOME TEST

Evaluation of mutagenicity of restorative dental materials using the Ames Salmonella/microsome test. Li, Y., *et al.*, 1188

AMINES

Amine-induced polymerization of aqueous HEMA/Aldehyde during action as a dentin bonding agent. Munksgaard, E.D., 1236

AMINO ACIDS

Amine-induced polymerization of aqueous HEMA/Aldehyde during action as a dentin bonding agent. Munksgaard, E.D., 1236

AMOXYCILLIN

Bacteremia in children following dental extraction. Coulter, W.A., *et al.*, 1691

AMYLASES

Effects of diabetes and insulin on α-amylase messenger RNA levels in rat parotid glands. Kim, S.K., *et al.*, 1500

ANALGESIA

Influence of chronic ethanol exposure on nitrous oxide analgesia in mice. Henry, R.J., *et al.*, 1674

ANEMIA, HEMOLYTIC

Depressed eruption rate of the rat maxillary incisor in a drug-induced uncompensated hemolytic state model. Giglio, M.J., *et al.*, 906

ANEUPLOIDY

Taurodontism in 45,x females. Varrela, J., *et al.*, 494

ANIMAL WELFARE

Apathy. Bowen, W.H., 1350
Guest editorial: the animal rights war on biomedical research: a call to arms. Gibson, W.A., 1703!

ANTIVIRAL AGENTS

In vitro virucidal effectiveness of a 0.12%-chlorhexidine gluconate mouthrinse. Bernstein, D., *et al.*, 874

ANTHROPOLOGY, PHYSICAL

Prevalence and pattern of distribution of root

caries in a Scottish medieval population, The. Kerr, N.W., 857

ANTIBIOTICS

Bacteremia in children following dental extraction. Coulter, W.A., *et al.*, 1691

ANTIBODIES

Human salivary peroxidase and bovine lactoperoxidase are cross-reactive. Mänsson-Rahemtulla, B., *et al.*, 1839

ANTIBODIES, MONOCLONAL

Characterization of monoclonal antibodies against glucosyltransferase synthesizing water-insoluble glucan from *Streptococcus sobrinus* B13. Ochiai, K. *et al.*, 477

Expression of integrins in human gingiva. Hormia, M., *et al.*, 1817

APATITES

Chemical and crystallographic events in the caries process. LeGeros, R.Z., 567#

Dependence of *in vitro* demineralization of apatite and remineralization of dental enamel on fluoride concentration. Featherstone, J.D.B., *et al.*, 620#

Effect of solution composition on morphological and structural features of carbonated calcium apatites. Shimoda, S., *et al.*, 1731

ATPASES

Diminished acid tolerance of plaque bacteria caused by fluoride. Marquis, R.E., 672#

BABOONS

Comparative microbiological and immunological studies of subgingival dental plaque from man and baboons. McMahon, K.T., *et al.*, 55

BACTERIA

Antimicrobial action of fluoride and its role in caries inhibition, The. Van Loveren, C., 676#

Biochemical effects of fluoride on oral bacteria. Hamilton, I.R., 660#

Diminished acid tolerance of plaque bacteria caused by fluoride. Marquis, R.E., 672#

Effect of dietary components on the indigenous oral bacterial flora of BALB/c mice. Blais, J.-F. and Lavoie, M.C., 868

Effect of fluoride on the stability of oral bacterial communities *in vitro*, The. Marsh, P.D. and Bradshaw, D.J., 668#

Effect of sucrose application and implantation of mutans streptococci on the microbial composition of three-week experimental plaque—an *in situ* study, The. MacPherson, L.M.D., *et al.*, 1706

Effects of fluoride on the microbial ecology of dental plaque. Bowden, G.H.W., 653#

Intra-oral appliance study of the plaque microflora associated with early enamel demineralization, An. MacPherson, L.M.D., *et al.*, 1712

Light and scanning electron microscopic study of enamel decalcification in children living in a water-fluoridated area, A. Thylstrup, A., *et al.*, 1626

Plaque fluid as a bacterial milieu. Edgar, W.M. and Higham, S.M., 1332*

Preferential adsorption of human neutrophil myeloperoxidase isoform III by oral bacteria. Miyasaki, K.T., 1780

Prevention of population shifts in oral microbial communities *in vitro* by low fluoride concentrations. Bradshaw, D.J., *et al.*, 436

RNA polymerases of *Porphyromonas gingivalis* and *Fusobacterium nucleatum* are unrelated to the RNA polymerase of *Escherichia coli*, The. Klimpel, K.W. and Clark, V.L., 1567

Ultrastructural study of bacterial invasion and tissue breakdown in human experimental root-surface caries, An. Nyvad, B. and Fejerskov, O., 1118

BACTERIAL ADHESION

Inhibition of *Streptococcus mutans* adherence by means of surface hydrophilization. Olsson, J., *et al.*, 1586

Polymorphism of submandibular-sublingual salivary proteins which promote adhesion of *Streptococcus mutans* serotype-c strains to hydroxyapatite. Kishimoto, E., *et al.*, 1741

BACTERIAL COUNT (see Colony Count, Microbial)

BACTERIAL INFECTIONS

Bacteremia in children following dental extraction. Coulter, W.A., *et al.*, 1691

Utility of the BANA test for monitoring anaerobic infections due to spirochetes (*Treponema denticola*) in periodontal disease, The. Loesche, W.J., *et al.*, 1696

BACTERIAL TOXINS

Mechanism of endotoxin inhibition of human gingival fibroblast attachment to type I collagen. Pitaru, S., *et al.*, 1602

BACTERIOCINS

Growth-inhibitory effects of the *Enterococcus faecalis* bacteriocin encoded by pAD1 extends to the oral streptococci, The. Jett, B.D. and Gilmore, M.S., 1640

BACTEROIDES

Comparative microbiological and immunological studies of subgingival dental plaque from man and baboons. McMahon, K.T., *et al.*, 55

Genetic heterogeneity of *Porphyromonas (Bacteroides) gingivalis* by genomic DNA fingerprinting. Loos, B.G., *et al.*, 1488, 1625 (correction)

Inhibitory effect of human plasma and saliva on co-aggregation between *Bacteroides gingivalis* and *Streptococcus mitis*. Nagata, H., *et al.*, 1476

Serum antibody response to antigens of oral gram-negative bacteria by cats with plasma cell gingivitis-pharyngitis. Sims, T.J., *et al.*, 877

BASEMENT MEMBRANE

Evidence for uptake of basement membrane by differentiating ameloblasts in the rat incisor enamel organ. Sawada, T., 1508

BENZOYLARGININE-2-NAPHTHYLAMIDE

Utility of the BANA test for monitoring anaerobic infections due to spirochetes (*Treponema denticola*) in periodontal disease, The. Loesche, W.J., *et al.*, 1696

BIOCOMPATIBLE MATERIALS

Evaluation of mutagenicity of restorative dental materials using the Ames Salmonella/microsome test. Li, Y., *et al.*, 1188

BIOLOGICAL AVAILABILITY

Pharmacokinetics of fluoride in man and its clinical relevance. Ekstrand, J., *et al.*, 550#

BITE FORCE

Development of horizontal tooth wear in maxillary anterior teeth from five to 18 years of age. Nyström, M., *et al.*, 1765

Jaw muscle activity in relation to the direction and point of application of bite force. Van Eijden, T.M.G.J., 901

BLOOD

Determination of pseudocholinesterase activity in the gingival crevicular fluid, saliva, and serum from patients with juvenile periodontitis and rapidly progressive periodontitis. Yamalik, N., *et al.*, 87

BONDING, DENTAL

Amine-induced polymerization of aqueous HEMA/Aldehyde during action as a dentin bonding agent. Munksgaard, E.D., 1236

Complete marginal seal of class V resin composite restorations effected by increased flexibility. Kemp-Scholte, C.M. and Davidson, C.L., 1240

Confocal microscopic study of some factors affecting the adaptation of a light-cured glass ionomer to tooth tissue, A. Watson, T.F., 1531

Effect of oxygen inhibition on an unfilled/filled composite system, The. Rueggeberg, F.A. and Margeson, D.H., 1652

Monomer composition and bond strength of light-cured 4-META opaque resin. Yoshida, K., *et al.*, 849

Oxide adherence and porcelain bonding to titanium and Ti-6Al-4V alloy. Adachi, M., *et al.*, 1230

Preliminary surface analysis of etched, bleached, and normal bovine enamel. Ruse, N.D., *et al.*, 1610

Scanning electron microscopic investigation of bonding of methacryloyloxyalkyl hydrogen maleate to etched dentin, A. Fukushima, T. and Horibe, T., 46

In vitro evaluation of a fluoride-releasing orthodontic resin. Chan, D.C.N., *et al.*, 1576

BONE AND BONES

Chemical and crystallographic events in the caries process. LeGeros, R.Z., 567#
Effect of fluoride on the developing mineralized tissues, The. Robinson, C. and Kirkham, J., 685#
Evaluation of alveolar bone in relation to nutritional status during pregnancy. Clark, D.E., *et al.*, 890
Guest editorial: research and progress of oral and maxillofacial surgery in the People's Republic of China. Wang, D., 915!
Relationship of TMJ articular soft tissue to underlying bone in young adult condyles. Pullinger, A.G., *et al.*, 1512
Water-borne fluoride and cortical bone mass: a comparison of two communities. Phipps, K.R. and Burt, B.A., 1256

BONE DEVELOPMENT

Transverse development of the human jaws between the ages of 8.5 and 15.5 years, studied longitudinally with use of implants. Korn, E.L. and Baumrind, S., 1298

BONE MATRIX

Inductive influences of demineralized dentin and bone matrix on pulp cells: an approach of secondary dentinogenesis. Tziafas, D. and Kolokuris, I., 75

BONE RESORPTION

Alveolar bone loss of senescence-accelerated mouse (SAM). Sashima, M., *et al.*, 82
Endocytosis in odontoclasts and osteoclasts using microperoxidase as a tracer. Tanaka, T., *et al.*, 883

CALCIUM

Inorganic components of cementum- and enamel-related dentin in the rat incisor, The. Steinfort, J., *et al.*, 1287
Micro-analysis of plaque fluid from single-site fasted plaque. Vogel, G.L., *et al.*, 1316*
Nature and role of loosely bound fluoride in dental caries. Arends, J. and Christoffersen, J., 601#

CALCIUM FLUORIDE

Critical evaluation of the composition and use of topical fluorides, with emphasis on the role of calcium fluoride in caries inhibition. Rølla, G. and Saxegaard, E., 780#
Effects of fluoride on caries development and progression *in vivo*. Øgaard, B., 813#
Kinetics of fluoride in the oral fluids. Dawes, C. and Weatherell, J.A., 638#
Physical and chemical considerations of the role of firmly and loosely bound fluoride in caries prevention. White, D.J. and Nancollas, G.H., 587#
Relative cariostatic effects of KOH-soluble and KOH-insoluble fluoride *in situ*. Øgaard, B., *et al.*, 1505

CALCIUM PHOSPHATES

Setting reactions and compressive strength of calcium phosphate. Fukase, Y., *et al.*, 1852

CANDIDA ALBICANS

Primary structure and anticandidal activity of the major histatin from parotid secretion of the subhuman primate, *Macaca fascicularis*. Xu, T., *et al.*, 1717
Structural relationship between human salivary histatins. Troxler, R.F., *et al.*, 2

CAPNOCYTOPHAGA

Preferential adsorption of human neutrophil myeloperoxidase isoform III by oral bacteria. Miyasaki, K.T., 1780

CARBOHYDRATES

Biochemical effects of fluoride on oral bacteria. Hamilton, I.R., 660#
Biochemical mechanisms of enhanced inhibition of fluoride on the anaerobic sugar metabolism by *Streptococcus sanguis*. Hata, S., *et al.*, 1244
Dental caries in developing countries in relation to the appropriate use of fluoride. Manji, F. and Fejerskov, O., 733#
Effect of fluoride on the stability of oral bacterial communities *in vitro*, The. Marsh, P.D. and Bradshaw, D.J., 668#

CARBONATES

Chemical and crystallographic events in the caries process. LeGeros, R.Z., 567#
Chemical events during tooth dissolution. Ingram, G.S., 581#
Effect of solution composition on morphological and structural features of carbonated calcium apatites. Shimoda, S., *et al.*, 1731

CARCINOGENS

Conference Report: special symposium, scientific update on fluoride and the public health. Wei, S.H.Y., 1343

CARIOSTATIC AGENTS

Antimicrobial action of fluoride and its role in caries inhibition, The. Van Loveren, C., 676#
Cariostatic efficacy of the combined use of fluorides. Marthaler, T.M., 797#
Comparison of the influence of lanthanum and fluoride on de- and remineralization of bovine enamel *in vitro*, A. Collys, K., *et al.*, 458
Critical evaluation of the composition and use of topical fluorides, with emphasis on the role of calcium fluoride in caries inhibition. Rølla, G. and Saxegaard, E., 780#
Dependence of *in vitro* demineralization of apatite and remineralization of dental enamel on fluoride concentration. Featherstone, J.D.B., *et al.*, 620#
Diminished acid tolerance of plaque bacteria caused by fluoride. Marquis, R.E., 672#
Effects of fluoride on caries development and progression using intra-oral models. Wefel, J.S., 626#
Evaluation of topical fluoride preparations. Mellberg, J.R., 771#
Physicochemical perspectives on the cariostatic mechanisms of systemic and topical fluorides. Margolis, H.C. and Moreno, E.C., 606#
Prevention of population shifts in oral microbial communities *in vitro* by low fluoride concentrations. Bradshaw, D.J., *et al.*, 436
Relative cariostatic effects of KOH-soluble and KOH-insoluble fluoride *in situ*. Øgaard, B., *et al.*, 1505
24-month clinical study of the incidence and progression of dental caries in relation to consumption of chewing gum containing xylitol in school preventive programs, A. Kandelman, D. and Gagnon, G., 1771

CARTILAGE

Chondrocyte-like colony formation of mesenchymal cells by dentin extracts in agarose gel culture. Harada, K., *et al.*, 1555
Phenotypic changes of rabbit mandibular condylar cartilage cells in culture. Engel, F.E., *et al.*, 1753
Stimulation of proteoglycan and DNA syntheses in chondrocytes by centrifugation. Inoue, H., *et al.*, 1560

CATS

Cellular roles in physiological root resorption of deciduous teeth in the cat. Sasaki, T., *et al.*, 67
Serum antibody response to antigens of oral gram-negative bacteria by cats with plasma cell gingivitis-pharyngitis. Sims, T.J., *et al.*, 877

CELL DIFFERENTIATION

Effect of fluoride on the developing mineralized tissues, The. Robinson, C. and Kirkham, J., 685#

CELL PHYSIOLOGY

Cellular roles in physiological root resorption of deciduous teeth in the cat. Sasaki, T., *et al.*, 67

CELLS, CULTURED

Cytotoxicity of experimental casting alloys evaluated by cell culture tests. Craig, R.G. and Hanks, C.T., 1539

CHEWING (see Mastication)

CHEWING GUM

24-month clinical study of the incidence and progression of dental caries in relation to consumption of chewing gum containing

xylitol in school preventive programs, A. Kandelman, D. and Gagnon, G., 1771

CHILD

Bacteremia in children following dental extraction. Coulter, W.A., *et al.*, 1691
Salivary flow rates and saliva film thickness in five-year-old children. Watanabe, S. and Dawes, C., 1150

CHINA

Guest editorial: research and progress of oral and maxillofacial surgery in the People's Republic of China. Wang, D., 915

CHLORHEXIDINE

In vitro virucidal effectiveness of a 0.12%-chlorhexidine gluconate mouthrinse. Bernstein, D., *et al.*, 874

CHOLINESTERASES

Determination of pseudocholinesterase activity in the gingival crevicular fluid, saliva, and serum from patients with juvenile periodontitis and rapidly progressive periodontitis. Yamalik, N., *et al.*, 87

CHONDROCYTES (see Cartilage)

CHROMIUM ALLOYS

Oral induction of immunological tolerance to chromium in the guinea pig. Vreeburg, K.J.J., *et al.*, 1634

CHROMOGRANINS

Localization of chromogranins, non-neuron-specific enolase, and different forms of somatostatins in the submandibular salivary glands of mice. Letic-Gavrilovic, A. and Abe, K., 1494

CHRONIC DISEASE

Twin half-sibs: a research design for genetic epidemiology of common dental disorders. Potter, R.H., 1527

CITRIC ACID

Mechanism for erosion of glass-ionomer cements in organic-acid buffer solutions, The. Fukazawa, M., *et al.*, 1175

CLASPS

Finite element analysis of the relationship between clasp dimensions and flexibility. Yuasa, Y., *et al.*, 1664

CLEFT PALATE

Conference report: symposium on "The Facial Skeleton in Clefts", sponsored by the American Cleft Palate-Craniofacial Association, May 13-14, 1990, St. Louis, Missouri. Sperber, G.H., 1622

CLONIDINE

Changes in protein secretion by rat submandibular glands in response to isoproterenol, α-methylnoradrenaline, and clonidine during post-natal development. Tanaka, E., *et al.*, 60

COLLAGENS

Mechanism of endotoxin inhibition of human gingival fibroblast attachment to type I collagen. Pitaru, S., *et al.*, 1602
Release of organic matrix components from bovine incisor roots during *in vitro* lesion formation. Klont, B. and Ten Cate, J.M., 896

COLONY COUNT, MICROBIAL

Limit of resolution of flow cytometry for the detection of selected bacterial species. Obernesser, M.S., *et al.*, 1592

COLOR

Effects of instrument-measuring geometry on colorimetric assessments of dental porcelains. Seghi, R.R., 1180
New, small-color-difference equation for dental shades, A. O'Brien, W.J., *et al.*, 1762

COMPOSITES

Amine-induced polymerization of aqueous HEMA/Aldehyde during action as a dentin bonding agent. Munksgaard, E.D., 1236
Complete marginal seal of class V resin composite restorations effected by increased flexibility. Kemp-Scholte, C.M. and Davidson, C.L., 1240
Cyclopolymerizable monomers for use in dental resin composites. Stansbury, J.W., 844
Effect of oxygen inhibition on an unfilled/filled composite system, The. Rueggeberg, F.A. and Margeson, D.H., 1652
Fracture-mechanics parameters of the composite-enamel bond. De Groot, R., *et al.*, 31
Gradual increase in marginal leakage of resin composite restorations with thermal stress. Momoi, Y., *et al.*, 1659
Influence of water exposure on the tensile strength of composites. Söderholm, K.-J.M. and Roberts, M.J., 1812
Mutans streptococci in plaque from margins of amalgam, composite, and glass-ionomer restorations. Svanberg, M., *et al.*, 861
Relationship between composition and properties of posterior resin composites, The. Chung, K.H., 852
Relaxation of polymerization contraction shear stress by hygroscopic expansion. Feilzer, A.J., *et al.*, 36

COMPUTER SIMULATION

Plaque fluid and diffusion: study of the cariogenic challenge by computer modeling. Dibdin, G.H., 1324*

CONNECTIVE TISSUE

Expression of integrins in human gingiva. Hormia, M., *et al.*, 1817

COPPER

Effect of Pd on the clinical performance of amalgam. Mahler, D.B., *et al.*, 1759
Relationship of restoration width, tooth position, and alloy to fracture at the margins of 13- to 14-year-old amalgams. Osborne, J.W. and Gale, E.N., 1599

CROSS-REACTION

Human salivary peroxidase and bovine lactoperoxidase are cross-reactive. Mänsson-Rahemtulla, B., *et al.*, 1839

CRYSTALLIZATION

Chemical and crystallographic events in the caries process. LeGeros, R.Z., 567#

CYTOKININS

Interactive effects between cytokines on PGE production by human periodontal ligament fibroblasts *in vitro*. Saito, S., *et al.*, 1456

CYTOTOXICITY

Cytotoxicity of experimental casting alloys evaluated by cell culture tests. Craig, R.G. and Hanks, C.T., 1539

DELAYED ACTION PREPARATIONS

In vitro evaluation of a fluoride-releasing orthodontic resin. Chan, D.C.N., *et al.*, 1576

DENTAL ALLOYS

Cytotoxicity of experimental casting alloys evaluated by cell culture tests. Craig, R.G. and Hanks, C.T., 1539
Oral induction of immunological tolerance to chromium in the guinea pig. Vreeburg, K.J.J., *et al.*, 1634
Oxide adherence and porcelain bonding to titanium and Ti-6Al-4V alloy. Adachi, M., *et al.*, 1230

DENTAL AMALGAM

Caries status of occlusal amalgam restorations with marginal defects, The. Kidd, E.A.M. and O'Hara, J.W., 1275
Effect of Pd on the clinical performance of amalgam. Mahler, D.B., *et al.*, 1759
Effect of placement of amalgam restorations on urinary mercury concentration. Landro Olstad, M., *et al.*, 1607
Effect of tin on the corrosion behavior of the Ag-Hg phase of dental amalgam and dissolution of mercury, The. Marek, M., 1786
Estimation by a 24-hour study of the daily dose of intra-oral mercury vapor inhaled after release from dental amalgam. Berglund, A., 1646
Mutans streptococci in plaque from margins of amalgam, composite, and glass-ionomer restorations. Svanberg, M., *et al.*, 861
Prevalence and need for replacement of amalgam and composite restorations in Dutch adults. Kroeze, H.J.P., *et al.*, 1270
Relationship of restoration width, tooth position, and alloy to fracture at the margins of 13- to 14-year-old amalgams. Osborne, J.W. and Gale, E.N., 1599
Release of mercury from dental amalgam: the

mechanism and *in vitro* testing, The. Marek, M., 1167

DENTAL CALCULUS

Measurement of dietary and dentifrice effects upon calculus accumulation rates in the domestic ferret. Harper, D.S., *et al.*, 447

DENTAL CARIES

Association of the microbial flora of dental plaque and saliva with human root-surface caries. Van Houte, J., *et al.*, 1463

Caries incidence in intact rats infected with *Streptococcus sobrinus via* transmission from desalivated cagemates. Madison, K.M., *et al.*, 1154

Caries status of occlusal amalgam restorations with marginal defects, The. Kidd, E.A.M. and O'Hara, J.W., 1275

Chemical and crystallographic events in the caries process. LeGeros, R.Z., 567#

Chemical events during tooth dissolution. Ingram, G.S., 581#

Chemical events during tooth dissolution. Larsen, M.J., 575#

Clinical evidence of the role of pre-eruptive fluoride in caries prevention. Thylstrup, A., 742#

Clinical signs of root caries: measurement issues from an epidemiologic perspective. Katz, R.V., 1211@

Complete marginal seal of class V resin composite restorations effected by increased flexibility. Kemp-Scholte, C.M. and Davidson, C.L., 1240

Dental caries in developing countries in relation to the appropriate use of fluoride. Manji, F. and Fejerskov, O., 733#

Dental caries prevalence and the use of fluorides in different European countries. Kalsbeek, H. and Verrips, G.H.W., 728#

Distribution and prevalence of mutans streptococci in the human dentition. Lindquist, B. and Emilson, C.G., 1160

Effect of nutritional status on the age distribution of dental caries in the primary teeth, The. Alvarez, J.O., *et al.*, 1564

Effect of plaque thickness on progression of artificial caries lesion formation *in situ*, The. Mellberg, J.R., *et al.*, 865

Effects of fluoride on caries development and progression *in vivo*. Øgaard, B., 813#

Effects of fluoride on caries development and progression using intra-oral models. Wefel, J.S., 626#

Effects of fluoride on the microbial ecology of dental plaque. Bowden, G.H.W., 653#

Effects of sucralose on coronal and root-surface caries. Bowen, W.H., *et al.*, 1485

Epidemiology of root surface caries, The. Beck, J., 1216@

Fluoride in caries prevention: is the effect pre- or post-eruptive? Groeneveld, A., *et al.*, 751#

Histopathology of root surface caries, Schüpbach, P., *et al.*, 1195@

Indices of root surface caries, Aherne, C.A., *et al.*, 1222@

Microbiology of root surface caries in humans. Bowden, G.H.W., 1205@

Mutans streptococci, oral hygiene, and caries in an adult Swedish population. Salonen, L., *et al.*, 1469

Nature and role of loosely bound fluoride in dental caries. Arends, J. and Christoffersen, J., 601#

Optical quantification of caries-like lesions *in vitro* by use of a fluorescent dye. Van de Rijke, J.W. and Ten Bosch, J.J., 1184

Physical and chemical considerations of the role of firmly and loosely bound fluoride in caries prevention. White, D.J. and Nancollas, G.H., 587#

Physicochemical perspectives on the cariostatic mechanisms of systemic and topical fluorides. Margolis, H.C. and Moreno, E.C., 606#

Plaque fluid and diffusion: study of the cariogenic challenge by computer modeling. Dibdin, G.H., 1324*

Prevalence and pattern of distribution of root caries in a Scottish medieval population, The. Kerr, N.W., 857

Quantitative radiographic measurement of dentinal lesions. Heaven, T.J., *et al.*, 51

Recent trends in dental caries in U.S. children and the effect of water fluoridation. Brunelle, J.A. and Carlos, J.P., 723#

Release of organic matrix components from bovine incisor roots during *in vitro* lesion formation. Klont, B. and Ten Cate, J.M., 896

Structural events in the caries process in enamel, cementum, and dentin. Frank, R.M., 559#

Tooth-bound fluoride and dental caries. Chow, L.C., 595#

24-month clinical study of the incidence and progression of dental caries in relation to consumption of chewing gum containing xylitol in school preventive programs, A. Kandelman, D. and Gagnon, G., 1771

Ultrastructural study of bacterial invasion and tissue breakdown in human experimental root-surface caries, An. Nyvad, B. and Fejerskov, O., 1118

In vitro studies on the effects of fluoride on de- and remineralization. Ten Cate, J.M., 614#

DENTAL CASTING INVESTMENT

Casting pure titanium into commercial phosphate-bonded SiO_2 investment molds. Takahashi, J., *et al.*, 1800

DENTAL CAVITY LINING

Complete marginal seal of class V resin composite restorations effected by increased flexibility. Kemp-Scholte, C.M. and Davidson, C.L., 1240

DENTAL CEMENTS

Influence of test method on failure stress of brittle dental materials. Ban, S. and Anusavice, K.J., 1791

Setting reactions and compressive strength of calcium phosphate. Fukase, Y., *et al.*, 1852

DENTAL CEMENTUM

Formation of acellular root cementum in relation to dental and non-dental hard tissues in the rat. Beertsen, W. and Everts, V., 1669

Histopathology of root surface caries, Schüpbach, P., *et al.*, 1195@

Inorganic components of cementum- and enamel-related dentin in the rat incisor, The. Steinfort, J., *et al.*, 1287

Release of organic matrix components from bovine incisor roots during *in vitro* lesion formation. Klont, B. and Ten Cate, J.M., 896

Structural events in the caries process in enamel, cementum, and dentin. Frank, R.M., 559#

Ultrastructural study of bacterial invasion and tissue breakdown in human experimental root-surface caries, An. Nyvad, B. and Fejerskov, O., 1118

DENTAL ENAMEL

Antimicrobial action of fluoride and its role in caries inhibition, The. Van Loveren, C., 676#

Assessment of loosely-bound and firmly-bound fluoride uptake by tooth enamel from topically applied fluoride treatments. Sieck, B., *et al.*, 1261

Caries status of occlusal amalgam restorations with marginal defects, The. Kidd, E.A.M. and O'Hara, J.W., 1275

Chemical and crystallographic events in the caries process. LeGeros, R.Z., 567#

Chemical events during tooth dissolution. Ingram, G.S., 581#

Chemical events during tooth dissolution. Larsen, M.J., 575#

Comparison of lead levels in human permanent teeth from Strasbourg, Mexico City, and rural zones of Alsace. Frank, R.M., *et al.*, 90

Comparison of the influence of lanthanum and fluoride on de- and remineralization of bovine enamel *in vitro*, A. Collys, K., *et al.*, 458

Dependence of *in vitro* demineralization of apatite and remineralization of dental enamel on fluoride concentration. Featherstone, J.D.B., *et al.*, 620#

Effect of fluoride on the developing mineralized tissues, The. Robinson, C. and Kirkham, J., 685#

Effect of solution composition on morphological and structural features of carbonated calcium apatites. Shimoda, S., *et al.*, 1731

Effects of fluoride on caries development and progression *in vivo*. Øgaard, B., 813#

Effects of fluoride on matrix proteins and their properties in rat secretory enamel. Aoba, T., *et al.*, 1248

Electrochemical impedance characterization of human and bovine enamel. Levinkind, M., *et al.*, 1806

Fracture-mechanics parameters of the composite-enamel bond. De Groot, R., *et al.*, 31

Inorganic components of cementum- and enamel-related dentin in the rat incisor, The. Steinfort, J., *et al.*, 1287

Intra-oral appliance study of the plaque microflora associated with early enamel demineralization, An. MacPherson, L.M.D., *et al.*, 1712

Nature and role of loosely bound fluoride in

dental caries. Arends, J. and Christoffersen, J., 601#
Physical and chemical considerations of the role of firmly and loosely bound fluoride in caries prevention. White, D.J. and Nancollas, G.H., 587#
Preliminary surface analysis of etched, bleached, and normal bovine enamel. Ruse, N.D., *et al.*, 1610
Shear bond strength of light-cured glass ionomer to enamel and dentin. McCaghren, R.A., *et al.*, 40
Structural events in the caries process in enamel, cementum, and dentin. Frank, R.M., 559#
Structural relationship between human salivary histatins. Troxler, R.F., *et al.*, 2
Tooth-bound fluoride and dental caries. Chow, L.C., 595#
In vitro studies on the effects of fluoride on de- and remineralization. Ten Cate, J.M., 614#
Wavelength-independent microradiography: a method for non-destructive quantification of enamel and dentin mineral concentrations using polychromatic x-rays. Herkströter, F.M. and Ten Bosch, J.J., 1522
Wavelength-independent microradiography used for quantification of mineral changes in thin enamel and dentin samples with natural surfaces, pseudo-thick tooth sections, and whole teeth. Herkströter, F.M., *et al.*, 1824

DENTAL EQUIPMENT

Effects of instrument-measuring geometry on colorimetric assessments of dental porcelains. Seghi, R.R., 1180
Hearing-damage risk and communication interference in dental practice. Wilson, C.E., *et al.*, 489

DENTAL HEALTH SURVEYS

Fluoride in caries prevention: is the effect pre- or post-eruptive? Groeneveld, A., *et al.*, 751#
Natural history of periodontal disease in adults: findings from the Tecumseh periodontal disease study, 1959-87. Ismail, A.I., *et al.*, 430
Prevalence and need for replacement of amalgam and composite restorations in Dutch adults. Kroeze, H.J.P., *et al.*, 1270
Recent trends in dental caries in U.S. children and the effect of water fluoridation. Brunelle, J.A. and Carlos, J.P., 723#
Risk factors for tooth loss over a 28-year period. Burt, B.A., *et al.*, 1126

DENTAL IMPLANTATION, ENDODONTIC

Histological comparison in the dog of porous-coated *vs.* threaded dental implants, A. Deporter, D.A., *et al.*, 1138

DENTAL MATERIALS

Evaluation of mutagenicity of restorative dental materials using the Ames Salmonella/microsome test. Li, Y., *et al.*, 1188
Influence of test method on failure stress of brittle dental materials. Ban, S. and Anusavice, K.J., 1791

DENTAL OCCLUSION

Long-term effects of orthodontic forces on the morphology of the rat-incisor socket and its location in the mandible. Brin, I., *et al.*, 1834
Textural properties of food used in studies of mastication. Wang, J.-S. and Stohler, C.S., 1546
Variation of approximal tooth contact tightness with postural change. Southard, T.E., *et al.*, 1776

DENTAL PLAQUE

Antimicrobial action of fluoride and its role in caries inhibition, The. Van Loveren, C., 676#
Association of the microbial flora of dental plaque and saliva with human root-surface caries. Van Houte, J., *et al.*, 1463
Biochemical effects of fluoride on oral bacteria. Hamilton, I.R., 660#
Biochemical mechanisms of enhanced inhibition of fluoride on the anaerobic sugar metabolism by *Streptococcus sanguis*. Hata, S., *et al.*, 1244
Clinical effects of a mouthrinse containing 0.1% octenidine, The. Beiswanger, B.B., *et al.*, 454
Colonization resistance of defined bacterial plaques to *Streptococcus mutans* implantation on teeth in a model mouth. Perrons, C.J. and Donoghue, H.D., 483
Comparative microbiological and immunological studies of subgingival dental plaque from man and baboons. McMahon, K.T., *et al.*, 55
Diminished acid tolerance of plaque bacteria caused by fluoride. Marquis, R.E., 672#
Effect of fluoride on the stability of oral bacterial communities *in vitro*, The. Marsh, P.D. and Bradshaw, D.J., 668#
Effect of pH on the growth and proteolytic activity of *Porphyromonas gingivalis* and *Bacteroides intermedius*. Takahashi, N. and Schachtele, C.F., 1266
Effect of plaque thickness on progression of artificial caries lesion formation *in situ*, The. Mellberg, J.R., *et al.*, 865
Effect of sucrose application and implantation of mutans streptococci on the microbial composition of three-week experimental plaque—an *in situ* study, The. MacPherson, L.M.D., *et al.*, 1706
Effects of fluoride on the microbial ecology of dental plaque. Bowden, G.H.W., 653#
Fluoride in dental plaque and its effects. Tatevossian, A., 645#
Intra-oral appliance study of the plaque microflora associated with early enamel demineralization, An. MacPherson, L.M.D., *et al.*, 1712
Kinetics of fluoride in the oral fluids. Dawes, C. and Weatherell, J.A., 638#
Light and scanning electron microscopic study of enamel decalcification in children living in a water-fluoridated area, A. Thylstrup, A., *et al.*, 1626
Mutans streptococci, oral hygiene, and caries in an adult Swedish population. Salonen, L., *et al.*, 1469
Mutans streptococci in plaque from margins of amalgam, composite, and glass-ionomer restorations. Svanberg, M., *et al.*, 861
Pharmacokinetics of fluoride in man and its clinical relevance. Ekstrand, J., *et al.*, 550#
Prevention of population shifts in oral microbial communities *in vitro* by low fluoride concentrations. Bradshaw, D.J., *et al.*, 436
Sorbitol adaptation of dental plaque in people with low and normal salivary-secretion rates. Kalfas, S., *et al.*, 442

DENTAL PLAQUE FLUID

Assessment of recent advances in the study of the chemistry and biochemistry of dental plaque fluid, An. Margolis, H.C., 1337*
Facts and artefacts in research on human dental plaque fluid. Tatevossian, A., 1309*
Micro-analysis of plaque fluid from single-site fasted plaque. Vogel, G.L., *et al.*, 1316*
Plaque fluid and diffusion: study of the cariogenic challenge by computer modeling. Dibdin, G.H., 1324*
Plaque fluid as a bacterial milieu. Edgar, W.M. and Higham, S.M., 1332*

DENTAL PORCELAINS

Effects of instrument-measuring geometry on colorimetric assessments of dental porcelains. Seghi, R.R., 1180
New, small-color-difference equation for dental shades, A. O'Brien, W.J., *et al.*, 1762
Oxide adherence and porcelain bonding to titanium and Ti-6Al-4V alloy. Adachi, M., *et al.*, 1230
Transient and residual stress in a porcelain-metal strip. Asaoka, K. and Tesk, J.A., 463

DENTAL PULP

Inductive influences of demineralized dentin and bone matrix on pulp cells: an approach of secondary dentinogenesis. Tziafas, D. and Kolokuris, I., 75
Properties of alkaline phosphatase of the human dental pulp. Goseki, M., *et al.*, 909

DENTAL RESTORATION, PERMANENT

Prevalence and need for replacement of amalgam and composite restorations in Dutch adults. Kroeze, H.J.P., *et al.*, 1270

DENTIFRICES

Clinical effects of a mouthrinse containing 0.1% octenidine, The. Beiswanger, B.B., *et al.*, 454
Critical evaluation of the composition and use of topical fluorides. Stookey, G.K., 805#
Evaluation of the use of professional (operator-applied) topical fluorides, An. Ripa, L.W., 786#
Evaluation of topical fluoride preparations. Mellberg, J.R., 771#
Measurement of dietary and dentifrice effects upon calculus accumulation rates in the domestic ferret. Harper, D.S., *et al.*, 447

DENTIN

Amine-induced polymerization of aqueous HEMA/Aldehyde during action as a dentin bonding agent. Munksgaard, E.D., 1236
Chemical and crystallographic events in the caries process. LeGeros, R.Z., 567#
Chondrocyte-like colony formation of mesenchymal cells by dentin extracts in agarose gel culture. Harada, K., *et al.*, 1555
Dependence of *in vitro* demineralization of apatite and remineralization of dental enamel on fluoride concentration. Featherstone, J.D.B., *et al.*, 620#
Endocytosis in odontoclasts and osteoclasts using microperoxidase as a tracer. Tanaka, T., *et al.*, 883
Formation of acellular root cementum in relation to dental and non-dental hard tissues in the rat. Beertsen, W. and Everts, V., 1669
Histopathology of root surface caries, Schüpbach, P., *et al.*, 1195@
Inorganic components of cementum- and enamel-related dentin in the rat incisor, The. Steinfort, J., *et al.*, 1287
Release of organic matrix components from bovine incisor roots during *in vitro* lesion formation. Klont, B. and Ten Cate, J.M., 896
Scanning electron microscopic investigation of bonding of methacryloyloxyalkyl hydrogen maleate to etched dentin, A. Fukushima, T. and Horibe, T., 46
Shear bond strength of light-cured glass ionomer to enamel and dentin. McCaghren, R.A., *et al.*, 40
Structural events in the caries process in enamel, cementum, and dentin. Frank, R.M., 559#
Transmission electron microscopic characterization of hypersensitive human radicular dentin. Yoshiyama, M., *et al.*, 1293
Wavelength-independent microradiography: a method for non-destructive quantification of enamel and dentin mineral concentrations using polychromatic x-rays. Herkströter, F.M. and Ten Bosch, J.J., 1522
Wavelength-independent microradiography used for quantification of mineral changes in thin enamel and dentin samples with natural surfaces, pseudo-thick tooth sections, and whole teeth. Herkströter, F.M., *et al.*, 1824

DENTIN SENSITIVITY

Transmission electron microscopic characterization of hypersensitive human radicular dentin. Yoshiyama, M., *et al.*, 1293

DENTINOGENESIS

Crown odontoblasts of rat molars from primary dentinogenesis to complete eruption, The. Romagnoli, P., *et al.*, 1857
Inductive influences of demineralized dentin and bone matrix on pulp cells: an approach of secondary dentinogenesis. Tziafas, D. and Kolokuris, I., 75

DENTISTRY

Guest editorial: research, as opposed to dental research — oral health rather than dentistry. Vig, P.S., 1447!
Guest editorial: research and progress of oral and maxillofacial surgery in the People's Republic of China. Wang, D., 915!
Guest editorial: transfer of innovation for advancement in dentistry. Nakata, M., 1543!

DENTISTS

Guest editorial: a modest proposal to help ameliorate a problem in the American dental profession. Tabak, L.A., 1227!

DENTURE, PARTIAL, REMOVABLE

Finite element analysis of the relationship between clasp dimensions and flexibility. Yuasa, Y., *et al.*, 1664

DIABETES MELLITUS

Effects of diabetes and insulin on α-amylase messenger RNA levels in rat parotid glands. Kim, S.K., *et al.*, 1500

DIAGNOSIS, ORAL

Indices of root surface caries, Aherne, C.A., *et al.*, 1222@

DIET

Effect of dietary components on the indigenous oral bacterial flora of BALB/c mice. Blais, J.-F. and Lavoie, M.C., 868
Effect of sucrose and fat in cookies on salivation and oral retention in humans, The. Brudevold, F., *et al.*, 1278
Evaluation of alveolar bone in relation to nutritional status during pregnancy. Clark, D.E., *et al.*, 890
Measurement of dietary and dentifrice effects upon calculus accumulation rates in the domestic ferret. Harper, D.S., *et al.*, 447
Prevalence and pattern of distribution of root caries in a Scottish medieval population, The. Kerr, N.W., 857

DIFFUSION OF INNOVATION

Guest editorial: transfer of innovation for advancement in dentistry. Nakata, M., 1543!

DMF INDEX

Dental caries in developing countries in relation to the appropriate use of fluoride. Manji, F. and Fejerskov, O., 733#
Dental caries prevalence and the use of fluorides in different European countries. Kalsbeek, H. and Verrips, G.H.W., 728#
Fluoride in caries prevention: is the effect pre- or post-eruptive? Groeneveld, A., *et al.*, 751#
Recent trends in dental caries in U.S. children and the effect of water fluoridation. Brunelle, J.A. and Carlos, J.P., 723#

DNA

Stimulation of proteoglycan and DNA syntheses in chondrocytes by centrifugation. Inoue, H., *et al.*, 1560

DNA RESTRICTION ENZYMES

Genetic heterogeneity of *Porphyromonas (Bacteroides) gingivalis* by genomic DNA fingerprinting. Loos, B.G., *et al.*, 1488, 1625 (correction)

DOGS

Histological comparison in the dog of porous-coated *vs.* threaded dental implants, A. Deporter, D.A., *et al.*, 1138

EDUCATION, DENTAL

"Storm fear" and "misgiving". Ranney, R.R., 1352
Guest editorial: a modest proposal to help ameliorate a problem in the American dental profession. Tabak, L.A., 1227!
Guest editorial: research, as opposed to dental research — oral health rather than dentistry. Vig, P.S., 1447!

EIKENELLA CORRODENS

Preferential adsorption of human neutrophil myeloperoxidase isoform III by oral bacteria. Miyasaki, K.T., 1780

ELASTICITY

Observations on the elastic behavior of a synthetic orthodontic elastomer. Huget, E.F., *et al.*, 496
Onset of elasticity in setting elastomers. McCabe, J.F. and Carrick, T.E., 1573

ELASTOMERS (see Rubber)

ELECTROCHEMISTRY

Electrochemical impedance characterization of human and bovine enamel. Levinkind, M., *et al.*, 1806

ELECTROMYOGRAPHY

Electromyographic heterogeneity in the human temporalis muscle. Blanksma, N.G. and Van Eijden, T.M.G.J., 1686

ENAMEL ORGAN

Evidence for uptake of basement membrane by differentiating ameloblasts in the rat incisor enamel organ. Sawada, T., 1508

ENDOCARDITIS, BACTERIAL

Bacteremia in children following dental extraction. Coulter, W.A., *et al.*, 1691

ENDOCYTOSIS

Endocytosis in odontoclasts and osteoclasts using microperoxidase as a tracer. Tanaka, T., *et al.*, 883

ENDODONTICS

Statistical models for evaluating the penetrating ability of endodontic instruments. Fuchs, C., *et al.*, 1617

ENDOTOXINS

Mechanism of endotoxin inhibition of human

gingival fibroblast attachment to type I collagen. Pitaru, S., *et al.*, 1602

ENOLASE (*see* Phosphopyruvate Hydratase)

ENTEROCOCCUS FAECALIS

Growth-inhibitory effects of the *Enterococcus faecalis* bacteriocin encoded by pAD1 extends to the oral streptococci, The. Jett, B.D. and Gilmore, M.S., 1640

EPIDEMIOLOGIC METHODS

Clinical signs of root caries: measurement issues from an epidemiologic perspective. Katz, R.V., 1211@

Epidemiology of root surface caries, The. Beck, J., 1216@

Indices of root surface caries, Aherne, C.A., *et al.*, 1222@

EPITHELIUM

Possible role of oral epithelial cells in tissue-type plasminogen activator-related fibrinolysis in human saliva, The. Sindet-Pedersen, S., *et al.*, 1283

ERYTHROMYCIN

Bacteremia in children following dental extraction. Coulter, W.A., *et al.*, 1691

ESCHERICHIA COLI

RNA polymerases of *Porphyromonas gingivalis* and *Fusobacterium nucleatum* are unrelated to the RNA polymerase of *Escherichia coli*, The. Klimpel, K.W. and Clark, V.L., 1567

ETHANOL (see Alcohol, Ethyl)

ETHICS, DENTAL

Guest editorial: ethical issues in research. Horowitz, H.S., 1345!

Guest editorial: petri dish to operatory: bridging the gap. Wathen, W.F., 502/1

FACE

Conference report: symposium on "The Facial Skeleton in Clefts", sponsored by the American Cleft Palate-Craniofacial Association, May 13-14, 1990, St. Louis, Missouri. Sperber, G.H., 1622

FAMILY

Twin half-sibs: a research design for genetic epidemiology of common dental disorders. Potter, R.H., 1527

FATS

Effect of sucrose and fat in cookies on salivation and oral retention in humans, The. Brudevold, F., *et al.*, 1278

FERRETS

Measurement of dietary and dentifrice effects upon calculus accumulation rates in the domestic ferret. Harper, D.S., *et al.*, 447

FIBRINOGEN

Inhibitory effect of human plasma and saliva on co-aggregation between *Bacteroides gingivalis* and *Streptococcus mitis*. Nagata, H., *et al.*, 1476

FIBRINOLYSIS

Possible role of oral epithelial cells in tissue-type plasminogen activator-related fibrinolysis in human saliva, The. Sindet-Pedersen, S., *et al.*, 1283

FIBROBLASTS

Formation of acellular root cementum in relation to dental and non-dental hard tissues in the rat. Beertsen, W. and Everts, V., 1669

Interactive effects between cytokines on PGE production by human periodontal ligament fibroblasts *in vitro*. Saito, S., *et al.*, 1456

Mechanism of endotoxin inhibition of human gingival fibroblast attachment to type I collagen. Pitaru, S., *et al.*, 1602

FLOW CYTOMETRY

Limit of resolution of flow cytometry for the detection of selected bacterial species. Obernesser, M.S., *et al.*, 1592

FLUORESCENT DYES

Optical quantification of caries-like lesions *in vitro* by use of a fluorescent dye. Van de Rijke, J.W. and Ten Bosch, J.J., 1184

FLUORIDATION

Apathy. Bowen, W.H., 1350

Cariostatic efficacy of the combined use of fluorides. Marthaler, T.M., 797#

Clinical evidence of the role of pre-eruptive fluoride in caries prevention. Thylstrup, A., 742#

Feasibility of the combined use of fluorides. König, K.G., 801#

Fluoride in caries prevention: is the effect pre- or post-eruptive? Groeneveld, A., *et al.*, 751#

Future of water fluoridation, The. O'Mullane, D.M., 756#

Future of water fluoridation and other systemic fluorides, The. Horowitz, H.S., 760#

Recent trends in dental caries in U.S. children and the effect of water fluoridation. Brunelle, J.A. and Carlos, J.P., 723#

Water fluoridation and fluoride supplementation: considerations for the future. Hargreaves, J.A., 765#

FLUORIDES

Antimicrobial action of fluoride and its role in caries inhibition, The. Van Loveren, C., 676#

Assessment of loosely-bound and firmly-bound fluoride uptake by tooth enamel from topically applied fluoride treatments. Sieck, B., *et al.*, 1261

Biochemical effects of fluoride on oral bacteria. Hamilton, I.R., 660#

Biochemical mechanisms of enhanced inhibition of fluoride on the anaerobic sugar metabolism by *Streptococcus sanguis*. Hata, S., *et al.*, 1244

Chemical and crystallographic events in the caries process. LeGeros, R.Z., 567#

Chemical events during tooth dissolution. Ingram, G.S., 581#

Chemical events during tooth dissolution. Larsen, M.J., 575#

Comparison of the influence of lanthanum and fluoride on de- and remineralization of bovine enamel *in vitro*, A. Collys, K., *et al.*, 458

Conference Report: special symposium, scientific update on fluoride and the public health. Wei, S.H.Y., 1343

Dental caries in developing countries in relation to the appropriate use of fluoride. Manji, F. and Fejerskov, O., 733#

Dental caries prevalence and the use of fluorides in different European countries. Kalsbeek, H. and Verrips, G.H.W., 728#

Dependence of *in vitro* demineralization of apatite and remineralization of dental enamel on fluoride concentration. Featherstone, J.D.B., *et al.*, 620#

Differential diagnosis of dental fluorosis. Cutress, T.W. and Suckling, G.W., 714#

Diminished acid tolerance of plaque bacteria caused by fluoride. Marquis, R.E., 672#

Effect of fluoride on the developing mineralized tissues, The. Robinson, C. and Kirkham, J., 685#

Effect of fluoride on the stability of oral bacterial communities *in vitro*, The. Marsh, P.D. and Bradshaw, D.J., 668#

Effects of fluoride on caries development and progression *in vivo*. Øgaard, B., 813#

Effects of fluoride on caries development and progression using intra-oral models. Wefel, J.S., 626#

Effects of fluoride on matrix proteins and their properties in rat secretory enamel. Aoba, T., *et al.*, 1248

Effects of fluoride on the microbial ecology of dental plaque. Bowden, G.H.W., 653#

Environmental and physiological factors affecting dental fluorosis. Angmar-Månsson, B. and Whitford, G.M., 706#

Fluoride in dental plaque and its effects. Tatevossian, A., 645#

Fluoride intake of infants in New Zealand. Chowdhury, N.G., *et al.*, 1828

Future of water fluoridation and other systemic fluorides, The. Horowitz, H.S., 760#

International symposium on fluorides: discussion of session I: metabolism of fluoride. Whitford, G.M., 556#

International symposium on fluorides: discussion of session II: fluoride and the caries process. Featherstone, J.D.B., 634#

International symposium on fluorides: discussion of session III: fluoride in saliva and dental plaque. Bowen, W.H., 682#

International symposium on fluorides: discussion of session IV: fluoride and calcified tissue mineralization. Robinson, C., 721#

International symposium on fluorides: discussion of session V: rational use of fluorides in prevention and therapy of dental caries. Stephen, K., 820#

International symposium on fluorides: summary of session I: metabolism of fluoride. Whitford, G.M. and Ekstrand, J., 513#
International symposium on fluorides: summary of session II: fluoride and the caries process. Koulourides, T., 558#
International symposium on fluorides: summary of session III: fluoride in saliva and dental plaque. Geddes, D.A.M. and Bowen, W.H., 637#
International symposium on fluorides: summary of session IV: fluoride and calcified tissue mineralization. Robinson, C. and Cutress, T.W., 684#
International symposium on fluorides: summary of session V: rational use of fluorides in prevention and therapy of dental caries. Stephen, K. and Stamm, J.W., 722#
Kinetics of fluoride in the oral fluids. Dawes, C. and Weatherell, J.A., 638#
Light and scanning electron microscopic study of enamel decalcification in children living in a water-fluoridated area, A. Thylstrup, A., *et al.*, 1626
Nature and mechanisms of dental fluorosis in animals. Richards, A., 701#
Nature and mechanisms of dental fluorosis in man, The. Fejerskov, O., *et al.*, 692#
Nature and role of loosely bound fluoride in dental caries. Arends, J. and Christoffersen, J., 601#
Physical and chemical considerations of the role of firmly and loosely bound fluoride in caries prevention. White, D.J. and Nancollas, G.H., 587#
Physicochemical perspectives on the cariostatic mechanisms of systemic and topical fluorides. Margolis, H.C. and Moreno, E.C., 606#
Prevention of population shifts in oral microbial communities *in vitro* by low fluoride concentrations. Bradshaw, D.J., *et al.*, 436
Relationship of total fluoride intake to beneficial effects and enamel fluorosis. Pendrys, D.G. and Stamm, J.W., 529#
Relative cariostatic effects of KOH-soluble and KOH-insoluble fluoride *in situ*. Øgaard, B., *et al.*, 1505
Structural events in the caries process in enamel, cementum, and dentin. Frank, R.M., 559#
Studies of human gastric mucosa after application of 0.42% fluoride gel. Spak, C.-J., *et al.*, 426
Tooth-bound fluoride and dental caries. Chow, L.C., 595#
In vitro evaluation of a fluoride-releasing orthodontic resin. Chan, D.C.N., *et al.*, 1576
In vitro studies on the effects of fluoride on de- and remineralization. Ten Cate, J.M., 614#
Water-borne fluoride and cortical bone mass: a comparison of two communities. Phipps, K.R. and Burt, B.A., 1256
Water fluoridation and fluoride supplementation: considerations for the future. Hargreaves, J.A., 765#

ANALYSIS

Evaluation of analytical methods for fluorine in biological and related materials. Venkateswarlu, P., 514#
Fluoride analysis in nanoliter- and microliter-size fluid samples. Vogel, G.L, *et al.*, 522#

METABOLISM

Biochemical effects of fluoride on oral bacteria. Hamilton, I.R., 660#
International symposium on fluorides: discussion of session I: metabolism of fluoride, Whitford, G.M., 556#
International symposium on fluorides: summary of session I: metabolism of fluoride, Whitford, G.M. and Ekstrand, J., 513#
Physiological and toxicological characteristics of fluoride, The. Whitford, G.M., 539#

PHARMACOKINETICS

Pharmacokinetics of fluoride in man and its clinical relevance. Ekstrand, J., *et al.*, 550#

PHYSIOLOGY

Physiological and toxicological characteristics of fluoride, The. Whitford, G.M., 539#

TOPICAL

Cariostatic efficacy of the combined use of fluorides. Marthaler, T.M., 797#
Critical evaluation of the composition and use of topical fluorides. Stookey, G.K., 805#
Critical evaluation of the composition and use of topical fluorides, with emphasis on the role of calcium fluoride in caries inhibition. Rølla, G. and Saxegaard, E., 780#
Evaluation of the use of professional (operator-applied) topical fluorides, An. Ripa, L.W., 786#
Evaluation of topical fluoride preparations. Mellberg, J.R., 771#
Feasibility of the combined use of fluorides. König, K.G., 801#
Relationship of total fluoride intake to beneficial effects and enamel fluorosis. Pendrys, D.G. and Stamm, J.W., 529#

TOXICITY

Physiological and toxicological characteristics of fluoride, The. Whitford, G.M., 539#

FLUORINE

Evaluation of analytical methods for fluorine in biological and related materials. Venkateswarlu, P., 514#

FLUOROSIS (*see* Mottled Enamel)

FOOD (*see* Diet)

FRACTURE

Fracture-mechanics parameters of the composite-enamel bond. De Groot, R., *et al.*, 31

FRANCE

Comparison of lead levels in human permanent teeth from Strasbourg, Mexico City, and rural zones of Alsace. Frank, R.M., *et al.*, 90

FRUCTOSYLTRANSFERASE

Influence of sucralose on bacterial metabolism, The. Young, D.A. and Bowen, W.H., 1480

FUSOBACTERIUM

Comparative microbiological and immunological studies of subgingival dental plaque from man and baboons. McMahon, K.T., *et al.*, 55
RNA polymerases of *Porphyromonas gingivalis* and *Fusobacterium nucleatum* are unrelated to the RNA polymerase of *Escherichia coli*, The. Klimpel, K.W. and Clark, V.L., 1567

GASTRIC MUCOSA

Studies of human gastric mucosa after application of 0.42% fluoride gel. Spak, C.-J., *et al.*, 426

GELS

Critical evaluation of the composition and use of topical fluorides. Stookey, G.K., 805#
Evaluation of the use of professional (operator-applied) topical fluorides, An. Ripa, L.W., 786#
Evaluation of topical fluoride preparations. Mellberg, J.R., 771#
Studies of human gastric mucosa after application of 0.42% fluoride gel. Spak, C.-J., *et al.*, 426

GENETICS, MEDICAL

Guest editorial: genetic studies of juvenile periodontitis. Potter, R.H., 95!
Taurodontism in 45,x females. Varrela, J., *et al.*, 494
Twin half-sibs: a research design for genetic epidemiology of common dental disorders. Potter, R.H., 1527

GENOMIC LIBRARY

Genetic heterogeneity of *Porphyromonas (Bacteroides) gingivalis* by genomic DNA fingerprinting. Loos, B.G., *et al.*, 1488, 1625 (correction)

GINGIVA

Effect of pH on the growth and proteolytic activity of *Porphyromonas gingivalis* and *Bacteroides intermedius*. Takahashi, N. and Schachtele, C.F., 1266
Expression of integrins in human gingiva. Hormia, M., *et al.*, 1817
Mechanism of endotoxin inhibition of human gingival fibroblast attachment to type I collagen. Pitaru, S., *et al.*, 1602

GINGIVAL CREVICULAR FLUID

Determination of pseudocholinesterase activity in the gingival crevicular fluid, saliva, and serum from patients with juvenile periodontitis and rapidly progressive periodontitis. Yamalik, N., *et al.*, 87

GINGIVITIS

Clinical effects of a mouthrinse containing 0.1% octenidine, The. Beiswanger, B.B., *et al.*, 454
Comparative microbiological and immunological studies of subgingival dental

plaque from man and baboons. McMahon, K.T., *et al.*, 55
Serum antibody response to antigens of oral gram-negative bacteria by cats with plasma cell gingivitis-pharyngitis. Sims, T.J., *et al.*, 877

GLASS-IONOMER CEMENTS

Confocal microscopic study of some factors affecting the adaptation of a light-cured glass ionomer to tooth tissue, A. Watson, T.F., 1531
Mechanism for erosion of glass-ionomer cements in organic-acid buffer solutions, The. Fukazawa, M., *et al.*, 1175
Mutans streptococci in plaque from margins of amalgam, composite, and glass-ionomer restorations. Svanberg, M., *et al.*, 861
Shear bond strength of light-cured glass ionomer to enamel and dentin. McCaghren, R.A., *et al.*, 40

GLUCANS

Characterization of monoclonal antibodies against glucosyltransferase synthesizing water-insoluble glucan from *Streptococcus sobrinus* B13. Ochiai, K. *et al.*, 477

GLUCOSE

Biochemical mechanisms of enhanced inhibition of fluoride on the anaerobic sugar metabolism by *Streptococcus sanguis*. Hata, S., *et al.*, 1244
Effect of fluoride on the stability of oral bacterial communities *in vitro*, The. Marsh, P.D. and Bradshaw, D.J., 668#

GLUCOSYLTRANSFERASE

Characterization of monoclonal antibodies against glucosyltransferase synthesizing water-insoluble glucan from *Streptococcus sobrinus* B13. Ochiai, K. *et al.*, 477
Influence of sucralose on bacterial metabolism, The. Young, D.A. and Bowen, W.H., 1480

GLUTARALDEHYDE

Amine-induced polymerization of aqueous HEMA/Aldehyde during action as a dentin bonding agent. Munksgaard, E.D., 1236

GLYCINE

Amine-induced polymerization of aqueous HEMA/Aldehyde during action as a dentin bonding agent. Munksgaard, E.D., 1236

GLYCOLYSIS

Biochemical mechanisms of enhanced inhibition of fluoride on the anaerobic sugar metabolism by *Streptococcus sanguis*. Hata, S., *et al.*, 1244

GLYCOSAMINOGLYCANS

Biochemical and immunohistochemical study of the proteoglycans of alveolar bone, A. Bartold, P.M., 7

GUINEA PIGS

Oral induction of immunological tolerance to chromium in the guinea pig. Vreeburg, K.J.J., *et al.*, 1634

H(+)-TRANSPORTING ATPASE

Biochemical effects of fluoride on oral bacteria. Hamilton, I.R., 660#

HAEMOPHILUS

Preferential adsorption of human neutrophil myeloperoxidase isoform III by oral bacteria. Miyasaki, K.T., 1780

HEARING LOSS, NOISE-INDUCED

Hearing-damage risk and communication interference in dental practice. Wilson, C.E., *et al.*, 489

HEMA (*see* Glutaraldehyde)

HEMORRHAGE, ORAL

Possible role of oral epithelial cells in tissue-type plasminogen activator-related fibrinolysis in human saliva, The. Sindet-Pedersen, S., *et al.*, 1283

HISTATINS

mRNAs for PRPs, statherin, and histatins in von Ebner's gland tissues. Azen, E.A., *et al.*, 1724
Primary structure and anticandidal activity of the major histatin from parotid secretion of the subhuman primate, *Macaca fascicularis*. Xu, T., *et al.*, 1717

HISTIDINE

Primary structure and anticandidal activity of the major histatin from parotid secretion of the subhuman primate, *Macaca fascicularis*. Xu, T., *et al.*, 1717
Structural relationship between human salivary histatins. Troxler, R.F., *et al.*, 2

HYDROGEN-ION CONCENTRATION

Chemical events during tooth dissolution. Larsen, M.J., 575#
Effect of fluoride on the stability of oral bacterial communities *in vitro*, The. Marsh, P.D. and Bradshaw, D.J., 668#
Effect of pH on the growth and proteolytic activity of *Porphyromonas gingivalis* and *Bacteroides intermedius*. Takahashi, N. and Schachtele, C.F., 1266
Micro-analysis of plaque fluid from single-site fasted plaque. Vogel, G.L., *et al.*, 1316*
pH regulation of urease levels in *Streptococcus salivarius*, Sissons, C.H., *et al.*, 1131
In vitro studies on the effects of fluoride on de- and remineralization. Ten Cate, J.M., 614#

HYDROGEN PEROXIDE

Preliminary surface analysis of etched, bleached, and normal bovine enamel. Ruse, N.D., *et al.*, 1610

HYDROXYAPATITES

Analysis of particle size distribution of hydroxyapatite crystallites in the presence of synthetic and natural polymers. Nancollas, G.H. and Budz, J.A., 1678
Chemical events during tooth dissolution. Ingram, G.S., 581#
Chemical events during tooth dissolution. Larsen, M.J., 575#
Effects of fluoride on matrix proteins and their properties in rat secretory enamel. Aoba, T., *et al.*, 1248
Inhibition of *Streptococcus mutans* adherence by means of surface hydrophilization. Olsson, J., *et al.*, 1586
Kinetics of fluoride in the oral fluids. Dawes, C. and Weatherell, J.A., 638#
Physical and chemical considerations of the role of firmly and loosely bound fluoride in caries prevention. White, D.J. and Nancollas, G.H., 587#
Polymorphism of submandibular-sublingual salivary proteins which promote adhesion of *Streptococcus mutans* serotype-c strains to hydroxyapatite. Kishimoto, E., *et al.*, 1741

HYGROSCOPIC EXPANSION

Relaxation of polymerization contraction shear stress by hygroscopic expansion. Feilzer, A.J., *et al.*, 36

HYSTERESIS

Hysteresis in jaw positioning following lateral stretches. Rugh, J.D., *et al.*, 470

IADR/AADR

Abstracts, IADR/AADR, 100-386
Divisional abstracts, 918-1108
Editorial: should 75% of IADR abstracts be rejected? Dawes, C., 1544!
Guest editorial: a materialistic look at the annual IADR/AADR meeting. Jones, D.W., 1784!
Guest editorial: meetings: format and growth, Caslavska, V., 1109!
IADR/AADR Council proceedings, general and annual sessions, 1352-1452
Survey of the publication history of randomly selected IADR/AADR abstracts presented in 1983 and 1984, A. Corry, A.M., 1453

IMAGE PROCESSING, COMPUTER-ASSISTED

Quantitative radiographic measurement of dentinal lesions. Heaven, T.J., *et al.*, 51

IMMUNITY

Oral induction of immunological tolerance to chromium in the guinea pig. Vreeburg, K.J.J., *et al.*, 1634

IMMUNOCHEMISTRY

Biochemical and immunohistochemical study of the proteoglycans of alveolar bone, A. Bartold, P.M., 7

IMPEDANCE

Electrochemical impedance characterization

of human and bovine enamel. Levinkind, M., *et al.*, 1806

IMPLANTS, ARTIFICIAL

Transverse development of the human jaws between the ages of 8.5 and 15.5 years, studied longitudinally with use of impiants. Korn, E.L. and Baumrind, S., 1298

INFANT FOOD

Fluoride intake of infants in New Zealand. Chowdhury, N.G., *et al.*, 1828

INFORMATION SYSTEMS

Guest editorial: petri dish to operatory: bridging the gap. Wathen, W.F., 502/1

INNOVATION DIFFUSION (*see* Diffusion of Innovation)

INSULIN

Effects of diabetes and insulin on α-amylase messenger RNA levels in rat parotid glands. Kim, S.K., *et al.*, 1500

INTEGRINS

Expression of integrins in human gingiva. Hormia, M., *et al.*, 1817

INTERFERON TYPE II

Interactive effects between cytokines on PGE production by human periodontal ligament fibroblasts *in vitro*. Saito, S., *et al.*, 1456

INTERLEUKIN-1

Interactive effects between cytokines on PGE production by human periodontal ligament fibroblasts *in vitro*. Saito, S., *et al.*, 1456

INVESTMENT (see Dental Casting Investment)

IODINE RADIOISOTOPES

Root hard-tissue demineralization rate measured by ^{125}I absorptiometry: comparison with lesion-depth measurements. Almqvist, H., *et al.*, 1519

IONS

Assessment of recent advances in the study of the chemistry and biochemistry of dental plaque fluid, An. Margolis, H.C., 1337*

Facts and artefacts in research on human dental plaque fluid. Tatevossian, A., 1309*

Micro-analysis of plaque fluid from single-site fasted plaque. Vogel, G.L., *et al.*, 1316*

ISOPROTERENOL

Changes in protein secretion by rat submandibular glands in response to isoproterenol, α-methylnoradrenaline, and clonidine during post-natal development. Tanaka, E., *et al.*, 60

JAW

Hysteresis in jaw positioning following lateral stretches. Rugh, J.D., *et al.*, 470

Transverse development of the human jaws between the ages of 8.5 and 15.5 years, studied longitudinally with use of implants. Korn, E.L. and Baumrind, S., 1298

KERATAN SULFATE

Biochemical and immunohistochemical study of the proteoglycans of alveolar bone, A. Bartold, P.M., 7

LACTOBACILLUS

Association of the microbial flora of dental plaque and saliva with human root-surface caries. Van Houte, J., *et al.*, 1463

Comparative microbiological and immunological studies of subgingival dental plaque from man and baboons. McMahon, K.T., *et al.*, 55

Effect of fluoride on the stability of oral bacterial communities *in vitro*, The. Marsh, P.D. and Bradshaw, D.J., 668#

Microbiology of root surface caries in humans. Bowden, G.H.W., 1205@

LACTOPEROXIDASE

Human salivary peroxidase and bovine lactoperoxidase are cross-reactive. Mänsson-Rahemtulla, B., *et al.*, 1839

LANTHANUM

Comparison of the influence of lanthanum and fluoride on de- and remineralization of bovine enamel *in vitro*, A. Collys, K., *et al.*, 458

LEAD

Comparison of lead levels in human permanent teeth from Strasbourg, Mexico City, and rural zones of Alsace. Frank, R.M., *et al.*, 90

LEAKAGE

Gradual increase in marginal leakage of resin composite restorations with thermal stress. Momoi, Y., *et al.*, 1659

MAGNESIUM

Chemical and crystallographic events in the caries process. LeGeros, R.Z., 567#

Chemical events during tooth dissolution. Ingram, G.S., 581#

Effect of fluoride on the developing mineralized tissues, The. Robinson, C. and Kirkham, J., 685#

Inorganic components of cementum- and enamel-related dentin in the rat incisor, The. Steinfort, J., *et al.*, 1287

MANDIBLE

Characteristics of mandibular masticatory movement in young and elderly dentate subjects. Karlsson, S. and Carlsson, G.E., 473

Evaluation of alveolar bone in relation to nutritional status during pregnancy. Clark, D.E., *et al.*, 890

Hysteresis in jaw positioning following lateral stretches. Rugh, J.D., *et al.*, 470

Long-term effects of orthodontic forces on the morphology of the rat-incisor socket and its location in the mandible. Brin, I., *et al.*, 1834

Transverse development of the human jaws between the ages of 8.5 and 15.5 years, studied longitudinally with use of implants. Korn, E.L. and Baumrind, S., 1298

MANDIBULAR CONDYLE

Periostomy and growth of the mandibular condyle in the rat. Killiany, D.M., 1551

Phenotypic changes of rabbit mandibular condylar cartilage cells in culture. Engel, F.E., *et al.*, 1753

Relationship of TMJ articular soft tissue to underlying bone in young adult condyles. Pullinger, A.G., *et al.*, 1512

MASSETER MUSCLES

Jaw muscle activity in relation to the direction and point of application of bite force. Van Eijden, T.M.G.J., 901

Microtrauma to rat superficial masseter muscles following lengthening contractions. Hutchins, M. O. and Skjonsby, H.S., 1580

MASTICATION

Characteristics of mandibular masticatory movement in young and elderly dentate subjects. Karlsson, S. and Carlsson, G.E., 473

Effect of sucrose and fat in cookies on salivation and oral retention in humans, The. Brudevold, F., *et al.*, 1278

Relationship of restoration width, tooth position, and alloy to fracture at the margins of 13- to 14-year-old amalgams. Osborne, J.W. and Gale, E.N., 1599

Textural properties of food used in studies of mastication. Wang, J.-S. and Stohler, C.S., 1546

MASTICATORY MUSCLES

Growth patterns of the rabbit masticatory muscles. Langenbach, G.E.J. and Weijs, W.A., 20

Hysteresis in jaw positioning following lateral stretches. Rugh, J.D., *et al.*, 470

Jaw muscle activity in relation to the direction and point of application of bite force. Van Eijden, T.M.G.J., 901

Microtrauma to rat superficial masseter muscles following lengthening contractions. Hutchins, M. O. and Skjonsby, H.S., 1580

MATRIX PROTEINS (*see* Mineralized Tissue Matrix Proteins)

MAXILLA

Transverse development of the human jaws between the ages of 8.5 and 15.5 years,

studied longitudinally with use of implants. Korn, E.L. and Baumrind, S., 1298

MERCURY

Effect of placement of amalgam restorations on urinary mercury concentration. Landro Olstad, M., *et al.*, 1607

Effect of tin on the corrosion behavior of the Ag-Hg phase of dental amalgam and dissolution of mercury, The. Marek, M., 1786

Estimation by a 24-hour study of the daily dose of intra-oral mercury vapor inhaled after release from dental amalgam. Berglund, A., 1646

Release of mercury from dental amalgam: the mechanism and *in vitro* testing, The. Marek, M., 1167

MESODERM

Chondrocyte-like colony formation of mesenchymal cells by dentin extracts in agarose gel culture. Harada, K., *et al.*, 1555

METHACRYLATES

Scanning electron microscopic investigation of bonding of methacryloyloxyalkyl hydrogen maleate to etched dentin, A. Fukushima, T. and Horibe, T., 46

METHYLNORADRENALINE

Changes in protein secretion by rat submandibular glands in response to isoproterenol, α-methylnoradrenaline, and clonidine during post-natal development. Tanaka, E., *et al.*, 60

METRONIDAZOLE

Utility of the BANA test for monitoring anaerobic infections due to spirochetes (*Treponema denticola*) in periodontal disease, The. Loesche, W.J., *et al.*, 1696

MEXICO

Comparison of lead levels in human permanent teeth from Strasbourg, Mexico City, and rural zones of Alsace. Frank, R.M., *et al.*, 90

MICE

Alveolar bone loss of senescence-accelerated mouse (SAM). Sashima, M., *et al.*, 82

Changes in protein secretion by rat submandibular glands in response to isoproterenol, α-methylnoradrenaline, and clonidine during post-natal development. Tanaka, E., *et al.*, 60

Characterization of monoclonal antibodies against glucosyltransferase synthesizing water-insoluble glucan from *Streptococcus sobrinus* B13. Ochiai, K. *et al.*, 477

Effect of dietary components on the indigenous oral bacterial flora of BALB/c mice. Blais, J.-F. and Lavoie, M.C., 868

Influence of chronic ethanol exposure on nitrous oxide analgesia in mice. Henry, R.J., *et al.*, 1674

Localization of chromogranins, non-neuron-specific enolase, and different forms of somatostatins in the submandibular salivary glands of mice. Letic-Gavrilovic, A. and Abe, K., 1494

mRNAs for PRPs, statherin, and histatins in von Ebner's gland tissues. Azen, E.A., *et al.*, 1724

MICRORADIOGRAPHY

Wavelength-independent microradiography: a method for non-destructive quantification of enamel and dentin mineral concentrations using polychromatic x-rays. Herkströter, F.M. and Ten Bosch, J.J., 1522

Wavelength-independent microradiography used for quantification of mineral changes in thin enamel and dentin samples with natural surfaces, pseudo-thick tooth sections, and whole teeth. Herkströter, F.M., *et al.*, 1824

MICROSCOPY, ELECTRON

Transmission electron microscopic characterization of hypersensitive human radicular dentin. Yoshiyama, M., *et al.*, 1293

MICROSCOPY, ELECTRON, SCANNING

A light and scanning electron microscopic study of enamel decalcification in children living in a water-fluoridated area. Thylstrup, A., *et al.*, 1626

Oxide adherence and porcelain bonding to titanium and Ti-6Al-4V alloy. Adachi, M., *et al.*, 1230

Scanning electron microscopic investigation of bonding of methacryloyloxyalkyl hydrogen maleate to etched dentin, A. Fukushima, T. and Horibe, T., 46

MINERALIZED TISSUE MATRIX PROTEINS

Effect of fluoride on the developing mineralized tissues, The. Robinson, C. and Kirkham, J., 685#

Effects of fluoride on matrix proteins and their properties in rat secretory enamel. Aoba, T., *et al.*, 1248

Inorganic components of cementum- and enamel-related dentin in the rat incisor, The. Steinfort, J., *et al.*, 1287

MINERALS

Effect of fluoride on the developing mineralized tissues, The. Robinson, C. and Kirkham, J., 685#

Measurement of dietary and dentifrice effects upon calculus accumulation rates in the domestic ferret. Harper, D.S., *et al.*, 447

MINORITY GROUPS

Guest editorial: a modest proposal to help ameliorate a problem in the American dental profession. Tabak, L.A., 1227!

MODELS, DENTAL

Colonization resistance of defined bacterial plaques to *Streptococcus mutans* implantation on teeth in a model mouth. Perrons, C.J. and Donoghue, H.D., 483

Effect of fluoride on the stability of oral bacterial communities *in vitro*, The. Marsh, P.D. and Bradshaw, D.J., 668#

Effects of fluoride on caries development and progression using intra-oral models. Wefel, J.S., 626#

Plaque fluid and diffusion: study of the cariogenic challenge by computer modeling. Dibdin, G.H., 1324*

MODELS, STATISTICAL

Statistical models for evaluating the penetrating ability of endodontic instruments. Fuchs, C., *et al.*, 1617

MOLAR

Taurodontism in 45,x females. Varrela, J., *et al.*, 494

MONKEYS

mRNAs for PRPs, statherin, and histatins in von Ebner's gland tissues. Azen, E.A., *et al.*, 1724

Primary structure and anticandidal activity of the major histatin from parotid secretion of the subhuman primate, *Macaca fascicularis*. Xu, T., *et al.*, 1717

MONOMERS

Cyclopolymerizable monomers for use in dental resin composites. Stansbury, J.W., 844

Monomer composition and bond strength of light-cured 4-META opaque resin. Yoshida, K., *et al.*, 849

MOTTLED ENAMEL

Differential diagnosis of dental fluorosis. Cutress, T.W. and Suckling, G.W., 714#

Environmental and physiological factors affecting dental fluorosis. Angmar-Månsson, B. and Whitford, G.M., 706#

Future of water fluoridation, The. O'Mullane, D.M., 756#

Nature and mechanisms of dental fluorosis in animals. Richards, A., 701#

Nature and mechanisms of dental fluorosis in man, The. Fejerskov, O., *et al.*, 692#

Relationship of total fluoride intake to beneficial effects and enamel fluorosis. Pendrys, D.G. and Stamm, J.W., 529#

Water fluoridation and fluoride supplementation: considerations for the future. Hargreaves, J.A., 765#

MOUTH, EDENTULOUS

Risk factors for tooth loss over a 28-year period. Burt, B.A., *et al.*, 1126

MOUTHWASHES

Clinical effects of a mouthrinse containing 0.1% octenidine, The. Beiswanger, B.B., *et al.*, 454

Critical evaluation of the composition and use of topical fluorides. Stookey, G.K., 805#

Evaluation of the use of professional (operator-applied) topical fluorides, An. Ripa, L.W., 786#

Evaluation of topical fluoride preparations. Mellberg, J.R., 771#
Sorbitol adaptation of dental plaque in people with low and normal salivary-secretion rates. Kalfas, S., *et al.*, 442
In vitro virucidal effectiveness of a 0.12%-chlorhexidine gluconate mouthrinse. Bernstein, D., *et al.*, 874

MUSCLE CONTRACTION

Hysteresis in jaw positioning following lateral stretches. Rugh, J.D., *et al.*, 470

MUSCLES

Growth patterns of the rabbit masticatory muscles. Langenbach, G.E.J. and Weijs, W.A., 20

MUTAGENICITY TESTS

Evaluation of mutagenicity of restorative dental materials using the Ames Salmonella/microsome test. Li, Y., *et al.*, 1188

MYELOPEROXIDASE

Preferential adsorption of human neutrophil myeloperoxidase isoform III by oral bacteria. Miyasaki, K.T., 1780

NATIONAL INSTITUTES OF HEALTH (U.S.)

Guest editorial: a new method to cut the pie at the NIH — a plan to replace "let them eat cake". Wise, G.E., 1623!

NEOPLASMS

Conference Report: special symposium, scientific update on fluoride and the public health. Wei, S.H.Y., 1343

NETHERLANDS

Prevalence and need for replacement of amalgam and composite restorations in Dutch adults. Kroeze, H.J.P., *et al.*, 1270

NEUTROPHILS

Preferential adsorption of human neutrophil myeloperoxidase isoform III by oral bacteria. Miyasaki, K.T., 1780

NEW ZEALAND

Fluoride intake of infants in New Zealand. Chowdhury, N.G., *et al.*, 1828

NITROUS OXIDE

Influence of chronic ethanol exposure on nitrous oxide analgesia in mice. Henry, R.J., *et al.*, 1674

NUTRITIONAL STATUS

Effect of nutritional status on the age distribution of dental caries in the primary teeth, The. Alvarez, J.O., *et al.*, 1564

OCTENIDINE

Clinical effects of a mouthrinse containing 0.1% octenidine, The. Beiswanger, B.B., *et al.*, 454

ODONTOBLASTS

Crown odontoblasts of rat molars from primary dentinogenesis to complete eruption, The. Romagnoli, P., *et al.*, 1857
Inductive influences of demineralized dentin and bone matrix on pulp cells: an approach of secondary dentinogenesis. Tziafas, D. and Kolokuris, I., 75

ODONTOCLASTS (*see* Osteoclasts)

OLIGOPEPTIDES

Influence by hydrophobicity on oligopeptide utilization by oral streptococci. Cowman, R.A. and Baron, S.S., 1847

ORAL HEALTH

Guest editorial: research, as opposed to dental research — oral health rather than dentistry. Vig, P.S., 1447!

ORAL HYGIENE

Mutans streptococci, oral hygiene, and caries in an adult Swedish population. Salonen, L., *et al.*, 1469

ORGANIC ACIDS

Mechanism for erosion of glass-ionomer cements in organic-acid buffer solutions, The. Fukazawa, M., *et al.*, 1175

OSTEOCLASTS

Cellular roles in physiological root resorption of deciduous teeth in the cat. Sasaki, T., *et al.*, 67
Endocytosis in odontoclasts and osteoclasts using microperoxidase as a tracer. Tanaka, T., *et al.*, 883

OXIDES

Oxide adherence and porcelain bonding to titanium and Ti-6Al-4V alloy. Adachi, M., *et al.*, 1230

OXYGEN

Effect of oxygen inhibition on an unfilled/filled composite system, The. Rueggeberg, F.A. and Margeson, D.H., 1652

PALATE

Transverse development of the human jaws between the ages of 8.5 and 15.5 years, studied longitudinally with use of implants. Korn, E.L. and Baumrind, S., 1298

PALLADIUM

Effect of Pd on the clinical performance of amalgam. Mahler, D.B., *et al.*, 1759

PELLICLE

Structural relationship between human salivary histatins. Troxler, R.F., *et al.*, 2

PENICILLIN

Bacteremia in children following dental extraction. Coulter, W.A., *et al.*, 1691

PEPTIDE HYDROLASES

Effect of pH on the growth and proteolytic activity of *Porphyromonas gingivalis* and *Bacteroides intermedius*. Takahashi, N. and Schachtele, C.F., 1266

PEPTIDES

Influence by hydrophobicity on oligopeptide utilization by oral streptococci. Cowman, R.A. and Baron, S.S., 1847
Structural relationship between human salivary histatins. Troxler, R.F., *et al.*, 2

PERIODONTAL DISEASES

Natural history of periodontal disease in adults: findings from the Tecumseh periodontal disease study, 1959-87. Ismail, A.I., *et al.*, 430

PERIODONTAL LIGAMENT

Formation of acellular root cementum in relation to dental and non-dental hard tissues in the rat. Beertsen, W. and Everts, V., 1669
Interactive effects between cytokines on PGE production by human periodontal ligament fibroblasts *in vitro*. Saito, S., *et al.*, 1456

PERIODONTITIS

Alveolar bone loss of senescence-accelerated mouse (SAM). Sashima, M., *et al.*, 82
Determination of pseudocholinesterase activity in the gingival crevicular fluid, saliva, and serum from patients with juvenile periodontitis and rapidly progressive periodontitis. Yamalik, N., *et al.*, 87
Guest editorial: genetic studies of juvenile periodontitis. Potter, R.H., 95!
Serum antibody response to antigens of oral gram-negative bacteria by cats with plasma cell gingivitis-pharyngitis. Sims, T.J., *et al.*, 877

PERIOSTEUM

Periostomy and growth of the mandibular condyle in the rat. Killiany, D.M., 1551

PEROXIDASES

Endocytosis in odontoclasts and osteoclasts using microperoxidase as a tracer. Tanaka, T., *et al.*, 883
Human salivary peroxidase and bovine lactoperoxidase are cross-reactive. Mänsson-Rahemtulla, B., *et al.*, 1839

pH (*see* **Hydrogen-Ion Concentration**)

PHARYNGITIS

Serum antibody response to antigens of oral gram-negative bacteria by cats with plasma cell gingivitis-pharyngitis. Sims, T.J., *et al.*, 877

PHENYLHYDRAZINES

Depressed eruption rate of the rat maxillary incisor in a drug-induced uncompensated hemolytic state model. Giglio, M.J., *et al.*, 906

PHOSPHATES

Casting pure titanium into commercial phosphate-bonded SiO_2 investment molds. Takahashi, J., *et al.*, 1800

Inorganic components of cementum- and enamel-related dentin in the rat incisor, The. Steinfort, J., *et al.*, 1287

Micro-analysis of plaque fluid from single-site fasted plaque. Vogel, G.L., *et al.*, 1316*

Release of organic matrix components from bovine incisor roots during *in vitro* lesion formation. Klont, B. and Ten Cate, J.M., 596

PHOSPHOENOLPYRUVATE SUGAR PHOSPHOTRANSFERASE SYSTEM

Biochemical mechanisms of enhanced inhibition of fluoride on the anaerobic sugar metabolism by *Streptococcus sanguis*. Hata, S., *et al.*, 1244

PHOSPHOPYRUVATE HYDRATASE

Biochemical effects of fluoride on oral bacteria. Hamilton, I.R., 660#

Localization of chromogranins, non-neuron-specific enolase, and different forms of somatostatins in the submandibular salivary glands of mice. Letic-Gavrilovic, A. and Abe, K., 1494

PLASMA

Inhibitory effect of human plasma and saliva on co-aggregation between *Bacteroides gingivalis* and *Streptococcus mitis*. Nagata, H., *et al.*, 1476

PLASMINOGEN ACTIVATOR, TISSUE TYPE

Possible role of oral epithelial cells in tissue-type plasminogen activator-related fibrinolysis in human saliva, The. Sindet-Pedersen, S., *et al.*, 1283

POLYMERIZATION CONTRACTION

Complete marginal seal of class V resin composite restorations effected by increased flexibility. Kemp-Scholte, C.M. and Davidson, C.L., 1240

POLYMERS

Amine-induced polymerization of aqueous HEMA/Aldehyde during action as a dentin bonding agent. Munksgaard, E.D., 1236

Analysis of particle size distribution of hydroxyapatite crystallites in the presence of synthetic and natural polymers. Nancollas, G.H. and Budz, J.A., 1678

Cyclopolymerizable monomers for use in dental resin composites. Stansbury, J.W., 844

PORPHYROMONAS GINGIVALIS

RNA polymerases of *Porphyromonas gingivalis* and *Fusobacterium nucleatum* are unrelated to the RNA polymerase of *Escherichia coli*, The. Klimpel, K.W. and Clark, V.L., 1567

POSTURE

Variation of approximal tooth contact tightness with postural change. Southard, T.E., *et al.*, 1776

POTASSIUM HYDROXIDE

Relative cariostatic effects of KOH-soluble and KOH-insoluble fluoride *in situ*. Øgaard, B., *et al.*, 1505

PREGNANCY

Evaluation of alveolar bone in relation to nutritional status during pregnancy. Clark, D.E., *et al.*, 890

PROLINE

mRNAs for PRPs, statherin, and histatins in von Ebner's gland tissues. Azen, E.A., *et al.*, 1724

PROSTAGLANDINS E

Interactive effects between cytokines on PGE production by human periodontal ligament fibroblasts *in vitro*. Saito, S., *et al.*, 1456

PROTEOGLYCANS

Biochemical and immunohistochemical study of the proteoglycans of alveolar bone, A. Bartold, P.M., 7

Stimulation of proteoglycan and DNA syntheses in chondrocytes by centrifugation. Inoue, H., *et al.*, 1560

PROTEOLYTIC ENZYMES (*see* Peptide Hydrolases)

RABBITS

Growth patterns of the rabbit masticatory muscles. Langenbach, G.E.J. and Weijs, W.A., 20

Phenotypic changes of rabbit mandibular condylar cartilage cells in culture. Engel, F.E., *et al.*, 1753

RADIOGRAPHY, DENTAL

Quantitative radiographic measurement of dentinal lesions. Heaven, T.J., *et al.*, 51

Transmission electron microscopic characterization of hypersensitive human radicular dentin. Yoshiyama, M., *et al.*, 1293

Wavelength-independent microradiography: a method for non-destructive quantification of enamel and dentin mineral concentrations using polychromatic x-rays. Herkströter, F.M. and Ten Bosch, J.J., 1522

RATS

Caries incidence in intact rats infected with *Streptococcus sobrinus via* transmission from desalivated cagemates. Madison, K.M., *et al.*, 1154

Chondrocyte-like colony formation of mesenchymal cells by dentin extracts in agarose gel culture. Harada, K., *et al.*, 1555

Crown odontoblasts of rat molars from primary dentinogenesis to complete eruption, The. Romagnoli, P., *et al.*, 1857

Depressed eruption rate of the rat maxillary incisor in a drug-induced uncompensated hemolytic state model. Giglio, M.J., *et al.*, 906

Effects of diabetes and insulin on α-amylase messenger RNA levels in rat parotid glands. Kim, S.K., *et al.*, 1500

Effects of fluoride on matrix proteins and their properties in rat secretory enamel. Aoba, T., *et al.*, 1248

Evidence for uptake of basement membrane by differentiating ameloblasts in the rat incisor enamel organ. Sawada, T., 1508

Formation of acellular root cementum in relation to dental and non-dental hard tissues in the rat. Beertsen, W. and Everts, V., 1669

Inorganic components of cementum- and enamel-related dentin in the rat incisor, The. Steinfort, J., *et al.*, 1287

Long-term effects of orthodontic forces on the morphology of the rat-incisor socket and its location in the mandible. Brin, I., *et al.*, 1834

Microtrauma to rat superficial masseter muscles following lengthening contractions. Hutchins, M. O. and Skjonsby, H.S., 1580

Periostomy and growth of the mandibular condyle in the rat. Killiany, D.M., 1551

RESEARCH

"Storm fear" and "misgiving". Ranney, R.R., 1352

Guest editorial: a new method to cut the pie at the NIH — a plan to replace "let them eat cake". Wise, G.E., 1623!

Guest editorial: ethical issues in research. Horowitz, H.S., 1345!

Guest editorial: petri dish to operatory: bridging the gap. Wathen, W.F., 502/1

Guest editorial: research, as opposed to dental research — oral health rather than dentistry. Vig, P.S., 1447!

Guest editorial: the animal rights war on biomedical research: a call to arms. Gibson, W.A., 1703!

RESINS

Complete marginal seal of class V resin composite restorations effected by increased flexibility. Kemp-Scholte, C.M. and Davidson, C.L., 1240

Confocal microscopic study of some factors affecting the adaptation of a light-cured glass ionomer to tooth tissue, A. Watson, T.F., 1531

Cyclopolymerizable monomers for use in dental resin composites. Stansbury, J.W., 844

Effect of oxygen inhibition on an unfilled/filled composite system, The. Rueggeberg, F.A. and Margeson, D.H., 1652

Gradual increase in marginal leakage of resin

composite restorations with thermal stress. Momoi, Y., *et al.*, 1659
Monomer composition and bond strength of light-cured 4-META opaque resin. Yoshida, K., *et al.*, 849
Relationship between composition and properties of posterior resin composites, The. Chung, K.H., 852
Relaxation of polymerization contraction shear stress by hygroscopic expansion. Feilzer, A.J., *et al.*, 36
In vitro evaluation of a fluoride-releasing orthodontic resin. Chan, D.C.N., *et al.*, 1576

RISK FACTORS

Risk factors for tooth loss over a 28-year period. Burt, B.A., *et al.*, 1126

RNA, MESSENGER

Effects of diabetes and insulin on α-amylase messenger RNA levels in rat parotid glands. Kim, S.K., *et al.*, 1500
mRNAs for PRPs, statherin, and histatins in von Ebner's gland tissues. Azen, E.A., *et al.*, 1724

RNA POLYMERASES

RNA polymerases of *Porphyromonas gingivalis* and *Fusobacterium nucleatum* are unrelated to the RNA polymerase of *Escherichia coli*, The. Klimpel, K.W. and Clark, V.L., 1567

ROOT RESORPTION

Cellular roles in physiological root resorption of deciduous teeth in the cat. Sasaki, T., *et al.*, 67
Endocytosis in odontoclasts and osteoclasts using microperoxidase as a tracer. Tanaka, T., *et al.*, 883

RUBBER

Onset of elasticity in setting elastomers. McCabe, J.F. and Carrick, T.E., 1573

RUBBER SILICONE (*see* Silicone Elastomers)

SALIVA

Analysis of particle size distribution of hydroxyapatite crystallites in the presence of synthetic and natural polymers. Nancollas, G.H. and Budz, J.A., 1678
Association of the microbial flora of dental plaque and saliva with human root-surface caries. Van Houte, J., *et al.*, 1463
Caries incidence in intact rats infected with *Streptococcus sobrinus via* transmission from desalivated cagemates. Madison, K.M., *et al.*, 1154
Characterization of the α-amylase receptor of *Streptococcus gordonii* NCTC 7868. Douglas, C.W.I., 1746
Determination of pseudocholinesterase activity in the gingival crevicular fluid, saliva, and serum from patients with juvenile periodontitis and rapidly progressive periodontitis. Yamalik, N., *et al.*, 87
Human salivary peroxidase and bovine lactoperoxidase are cross-reactive. Mänsson-Rahemtulla, B., *et al.*, 1839
Inhibition of *Streptococcus mutans* adherence by means of surface hydrophilization. Olsson, J., *et al.*, 1586
Inhibitory effect of human plasma and saliva on co-aggregation between *Bacteroides gingivalis* and *Streptococcus mitis*. Nagata, H., *et al.*, 1476
Interaction of saliva and taste. Spielman, A.I., 838
Kinetics of fluoride in the oral fluids. Dawes, C. and Weatherell, J.A., 638#
Method for measuring the flow of saliva from the minor salivary glands, A. Shern, R.J., *et al.*, 1146
Pharmacokinetics of fluoride in man and its clinical relevance. Ekstrand, J., *et al.*, 550#
Possible role of oral epithelial cells in tissue-type plasminogen activator-related fibrinolysis in human saliva, The. Sindet-Pedersen, S., *et al.*, 1283
Salivary flow rates and saliva film thickness in five-year-old children. Watanabe, S. and Dawes, C., 1150
Sorbitol adaptation of dental plaque in people with low and normal salivary-secretion rates. Kalfas, S., *et al.*, 442

SALIVARY GLANDS

MINOR

Method for measuring the flow of saliva from the minor salivary glands, A. Shern, R.J., *et al.*, 1146

PAROTID

Effects of diabetes and insulin on α-amylase messenger RNA levels in rat parotid glands. Kim, S.K., *et al.*, 1500
Primary structure and anticandidal activity of the major histatin from parotid secretion of the subhuman primate, *Macaca fascicularis*. Xu, T., *et al.*, 1717
Structural relationship between human salivary histatins. Troxler, R.F., *et al.*, 2

SUBLINGUAL

Polymorphism of submandibular-sublingual salivary proteins which promote adhesion of *Streptococcus mutans* serotype-c strains to hydroxyapatite. Kishimoto, E., *et al.*, 1741

SUBMANDIBULAR

Localization of chromogranins, non-neuron-specific enolase, and different forms of somatostatins in the submandibular salivary glands of mice. Letic-Gavrilovic, A. and Abe, K., 1494
Polymorphism of submandibular-sublingual salivary proteins which promote adhesion of *Streptococcus mutans* serotype-c strains to hydroxyapatite. Kishimoto, E., *et al.*, 1741

SALIVARY PROTEINS

Changes in protein secretion by rat submandibular glands in response to isoproterenol, α-methylnoradrenaline and clonidine during post-natal development. Tanaka, E., *et al.*, 60
Polymorphism of submandibular-sublingual salivary proteins which promote adhesion of *Streptococcus mutans* serotype-c strains to hydroxyapatite. Kishimoto, E., *et al.*, 1741
Structural relationship between human salivary histatins. Troxler, R.F., *et al.*, 2

SALIVATION

Effect of sucrose and fat in cookies on salivation and oral retention in humans, The. Brudevold, F., *et al.*, 1278

SCHOOL HEALTH SERVICES

24-month clinical study of the incidence and progression of dental caries in relation to consumption of chewing gum containing xylitol in school preventive programs, A. Kandelman, D. and Gagnon, G., 1771

SCIENTIFIC MISCONDUCT

Guest editorial: ethical issues in research. Horowitz, H.S., 1345!

SHEAR BOND STRENGTH

Effect of oxygen inhibition on an unfilled/filled composite system, The. Rueggeberg, F.A. and Margeson, D.H., 1652
Relaxation of polymerization contraction shear stress by hygroscopic expansion. Feilzer, A.J., *et al.*, 36
Scanning electron microscopic investigation of bonding of methacryloyloxyalkyl hydrogen maleate to etched dentin, A. Fukushima, T. and Horibe, T., 46
Shear bond strength of light-cured glass ionomer to enamel and dentin. McCaghren, R.A., *et al.*, 40

SILICON

Casting pure titanium into commercial phosphate-bonded SiO_2 investment molds. Takahashi, J., *et al.*, 1800

SILICONE ELASTOMERS

Observations on the elastic behavior of a synthetic orthodontic elastomer. Huget, E.F., *et al.*, 496

SILVER

Effect of tin on the corrosion behavior of the Ag-Hg phase of dental amalgam and dissolution of mercury, The. Marek, M., 1786

SOCIAL VALUES

Apathy. Bowen, W.H., 1350

SOLUBILITY

Chemical events during tooth dissolution. Ingram, G.S., 581#
Chemical events during tooth dissolution. Larsen, M.J., 575#
Dependence of *in vitro* demineralization of apatite and remineralization of dental enamel on fluoride concentration. Featherstone, J.D.B., *et al.*, 620#
Nature and role of loosely bound fluoride in dental caries. Arends, J. and Christoffersen, J., 601#

In vitro studies on the effects of fluoride on de- and remineralization. Ten Cate, J.M., 614#

SOMATOSTATIN

Localization of chromogranins, non-neuron-specific enolase, and different forms of somatostatins in the submandibular salivary glands of mice. Letic-Gavrilovic, A. and Abe, K., 1494

SORBITOL

Sorbitol adaptation of dental plaque in people with low and normal salivary-secretion rates. Kalfas, S., *et al.*, 442

STAINS AND STAINING

Clinical effects of a mouthrinse containing 0.1% octenidine, The. Beiswanger, B.B., *et al.*, 454

STATHERIN

mRNAs for PRPs, statherin, and histatins in von Ebner's gland tissues. Azen, E.A., *et al.*, 1724

STATISTICAL MODELS (see Models, Statistical)

STREPTOCOCCUS

Association of the microbial flora of dental plaque and saliva with human root-surface caries. Van Houte, J., *et al.*, 1463
Effects of fluoride on the microbial ecology of dental plaque. Bowden, G.H.W., 653#
Influence by hydrophobicity on oligopeptide utilization by oral streptococci. Cowman, R.A. and Baron, S.S., 1847
Influence of sucralose on bacterial metabolism, The. Young, D.A. and Bowen, W.H., 1480
Microbiology of root surface caries in humans. Bowden, G.H.W., 1205@

FAECALIS

Growth-inhibitory effects of the *Enterococcus faecalis* bacteriocin encoded by pAD1 extends to the oral streptococci, The. Jett, B.D. and Gilmore, M.S., 1640

GORDONII

Characterization of the α-amylase receptor of *Streptococcus gordonii* NCTC 7868. Douglas, C.W.I., 1746

MITIS

Inhibitory effect of human plasma and saliva on co-aggregation between *Bacteroides gingivalis* and *Streptococcus mitis*. Nagata, H., *et al.*, 1476

MUTANS

Antimicrobial action of fluoride and its role in caries inhibition, The. Van Loveren, C., 676#
Characterization of monoclonal antibodies against glucosyltransferase synthesizing water-insoluble glucan from *Streptococcus sobrinus* B13. Ochiai, K. *et al.*, 477
Colonization resistance of defined bacterial plaques to *Streptococcus mutans* implantation on teeth in a model mouth. Perrons, C.J. and Donoghue, H.D., 483
Dental caries in developing countries in relation to the appropriate use of fluoride. Manji, F. and Fejerskov, O., 733#
Diminished acid tolerance of plaque bacteria caused by fluoride. Marquis, R.E., 672#
Distribution and prevalence of mutans streptococci in the human dentition. Lindquist, B. and Emilson, C.G., 1160
Effect of fluoride on the stability of oral bacterial communities *in vitro*, The. Marsh, P.D. and Bradshaw, D.J., 668#
Effect of sucrose application and implantation of mutans streptococci on the microbial composition of three-week experimental plaque—an *in situ* study, The. MacPherson, L.M.D., *et al.*, 1706
Effects of sucralose on coronal and root-surface caries. Bowen, W.H., *et al.*, 1485
Influence by hydrophobicity on oligopeptide utilization by oral streptococci. Cowman, R.A. and Baron, S.S., 1847
Inhibition of *Streptococcus mutans* adherence by means of surface hydrophilization. Olsson, J., *et al.*, 1586
Intra-oral appliance study of the plaque microflora associated with early enamel demineralization, An. MacPherson, L.M.D., *et al.*, 1712
Mutans streptococci, oral hygiene, and caries in an adult Swedish population. Salonen, L., *et al.*, 1469
Mutans streptococci in plaque from margins of amalgam, composite, and glass-ionomer restorations. Svanberg, M., *et al.*, 861
Polymorphism of submandibular-sublingual salivary proteins which promote adhesion of *Streptococcus mutans* serotype-c strains to hydroxyapatite. Kishimoto, E., *et al.*, 1741

SALIVARIUS

pH regulation of urease levels in *Streptococcus salivarius*, Sissons, C.H., *et al.*, 1131

SANGUIS

Biochemical mechanisms of enhanced inhibition of fluoride on the anaerobic sugar metabolism by *Streptococcus sanguis*. Hata, S., *et al.*, 1244

STRESS, MECHANICAL

Fracture-mechanics parameters of the composite-enamel bond. De Groot, R., *et al.*, 31
Gradual increase in marginal leakage of resin composite restorations with thermal stress. Momoi, Y., *et al.*, 1659
Influence of test method on failure stress of brittle dental materials. Ban, S. and Anusavice, K.J., 1791
Relaxation of polymerization contraction shear stress by hygroscopic expansion. Feilzer, A.J., *et al.*, 36
Transient and residual stress in a porcelain-metal strip. Asaoka, K. and Tesk, J.A., 463

STRONTIUM

Chemical and crystallographic events in the caries process. LeGeros, R.Z., 567#

SUCRALOSE

Effects of sucralose on coronal and root-surface caries. Bowen, W.H., *et al.*, 1485
Influence of sucralose on bacterial metabolism, The. Young, D.A. and Bowen, W.H., 1480

SUCROSE

Effect of dietary components on the indigenous oral bacterial flora of BALB/c mice. Blais, J.-F. and Lavoie, M.C., 868
Effect of sucrose and fat in cookies on salivation and oral retention in humans, The. Brudevold, F., *et al.*, 1278
Effect of sucrose application and implantation of mutans streptococci on the microbial composition of three-week experimental plaque—an *in situ* study, The. MacPherson, L.M.D., *et al.*, 1706
Effects of sucralose on coronal and root-surface caries. Bowen, W.H., *et al.*, 1485
Influence of sucralose on bacterial metabolism, The. Young, D.A. and Bowen, W.H., 1480
Intra-oral appliance study of the plaque microflora associated with early enamel demineralization, An. MacPherson, L.M.D., *et al.*, 1712

SURFACE PROPERTIES

Inhibition of *Streptococcus mutans* adherence by means of surface hydrophilization. Olsson, J., *et al.*, 1586

SURGERY, ORAL

Guest editorial: research and progress of oral and maxillofacial surgery in the People's Republic of China. Wang, D., 915

SURGERY, PLASTIC

Guest editorial: research and progress of oral and maxillofacial surgery in the People's Republic of China. Wang, D., 915!

SWINE

Biochemical and immunohistochemical study of the proteoglycans of alveolar bone, A. Bartold, P.M., 7

TASTE

Interaction of saliva and taste. Spielman, A.I., 838

TASTE BUDS

mRNAs for PRPs, statherin, and histatins in von Ebner's gland tissues. Azen, E.A., *et al.*, 1724

TAURODONTISM

Taurodontism in 45,x females. Varrela, J., *et al.*, 494

TEMPORAL MUSCLE

Electromyographic heterogeneity in the human temporalis muscle. Blanksma, N.G. and Van Eijden, T.M.G.J., 1686

TEMPOROMANDIBULAR JOINT

Relationship of TMJ articular soft tissue to underlying bone in young adult condyles. Pullinger, A.G., *et al.*, 1512

TENSILE STRENGTH

Influence of test method on failure stress of brittle dental materials. Ban, S. and Anusavice, K.J., 1791

Influence of water exposure on the tensile strength of composites. Söderholm, K.-J.M. and Roberts, M.J., 1812

THERMAL STRESS

Gradual increase in marginal leakage of resin composite restorations with thermal stress. Momoi, Y., *et al.*, 1659

TIN

Effect of tin on the corrosion behavior of the Ag-Hg phase of dental amalgam and dissolution of mercury, The. Marek, M., 1786

TITANIUM

Casting pure titanium into commercial phosphate-bonded SiO_2 investment molds. Takahashi, J., *et al.*, 1800

Histological comparison in the dog of porous-coated *vs.* threaded dental implants, A. Deporter, D.A., *et al.*, 1138

Oxide adherence and porcelain bonding to titanium and Ti-6Al-4V alloy. Adachi, M., *et al.*, 1230

TOOTH ABRASION

Development of horizontal tooth wear in maxillary anterior teeth from five to 18 years of age. Nyström, M., *et al.*, 1765

TOOTH, DECIDUOUS

Cellular roles in physiological root resorption of deciduous teeth in the cat. Sasaki, T., *et al.*, 67

TOOTH DEMINERALIZATION

Comparison of the influence of lanthanum and fluoride on de- and remineralization of bovine enamel *in vitro*, A. Collys, K., *et al.*, 458

Inductive influences of demineralized dentin and bone matrix on pulp cells: an approach of secondary dentinogenesis. Tziafas, D. and Kolokuris, I., 75

Intra-oral appliance study of the plaque microflora associated with early enamel demineralization, An. MacPherson, L.M.D., *et al.*, 1712

Light and scanning electron microscopic study of enamel decalcification in children living in a water-fluoridated area, A. Thylstrup, A., *et al.*, 1626

Root hard-tissue demineralization rate measured by ^{125}I absorptiometry: comparison with lesion-depth measurements. Almqvist, H., *et al.*, 1519

Wavelength-independent microradiography used for quantification of mineral changes in thin enamel and dentin samples with natural surfaces, pseudo-thick tooth sections, and whole teeth. Herkströter, F.M., *et al.*, 1824

TOOTH ERUPTION

Clinical evidence of the role of pre-eruptive fluoride in caries prevention. Thylstrup, A., 742#

Crown odontoblasts of rat molars from primary dentinogenesis to complete eruption, The. Romagnoli, P., *et al.*, 1857

Depressed eruption rate of the rat maxillary incisor in a drug-induced uncompensated hemolytic state model. Giglio, M.J., *et al.*, 906

Effect of nutritional status on the age distribution of dental caries in the primary teeth, The. Alvarez, J.O., *et al.*, 1564

Fluoride in caries prevention: is the effect pre- or post-eruptive? Groeneveld, A., *et al.*, 751#

Future of water fluoridation and other systemic fluorides, The. Horowitz, H.S., 760#

Long-term effects of orthodontic forces on the morphology of the rat-incisor socket and its location in the mandible. Brin, I., *et al.*, 1834

TOOTH EXTRACTION

Bacteremia in children following dental extraction. Coulter, W.A., *et al.*, 1691

TOOTH MOBILITY

Variation of approximal tooth contact tightness with postural change. Southard, T.E., *et al.*, 1776

TOOTH REMINERALIZATION

Comparison of the influence of lanthanum and fluoride on de- and remineralization of bovine enamel *in vitro*, A. Collys, K., *et al.*, 458

Dependence of *in vitro* demineralization of apatite and remineralization of dental enamel on fluoride concentration. Featherstone, J.D.B., *et al.*, 620#

Effects of fluoride on caries development and progression using intra-oral models. Wefel, J.S., 626#

In vitro studies on the effects of fluoride on de- and remineralization. Ten Cate, J.M., 614#

TOOTH ROOT

Cellular roles in physiological root resorption of deciduous teeth in the cat. Sasaki, T., *et al.*, 67

Clinical signs of root caries: measurement issues from an epidemiologic perspective. Katz, R.V., 1211@

Epidemiology of root surface caries, The. Beck, J., 1216@

Histopathology of root surface caries, Schüpbach, P., *et al.*, 1195@

Indices of root surface caries, Aherne, C.A., *et al.*, 1222@

Microbiology of root surface caries in humans. Bowden, G.H.W., 1205@

Prevalence and pattern of distribution of root caries in a Scottish medieval population, The. Kerr, N.W., 857

Release of organic matrix components from bovine incisor roots during *in vitro* lesion formation. Klont, B. and Ten Cate, J.M., 896

Root hard-tissue demineralization rate measured by ^{125}I absorptiometry: comparison with lesion-depth measurements. Almqvist, H., *et al.*, 1519

Statistical models for evaluating the penetrating ability of endodontic instruments. Fuchs, C., *et al.*, 1617

Ultrastructural study of bacterial invasion and tissue breakdown in human experimental root-surface caries, An. Nyvad, B. and Fejerskov, O., 1118

TOOTHPASTE

Measurement of dietary and dentifrice effects upon calculus accumulation rates in the domestic ferret. Harper, D.S., *et al.*, 447

TREPONEMAL INFECTIONS

Utility of the BANA test for monitoring anaerobic infections due to spirochetes (*Treponema denticola*) in periodontal disease, The. Loesche, W.J., *et al.*, 1696

TUMOR NECROSIS FACTOR

Interactive effects between cytokines on PGE production by human periodontal ligament fibroblasts *in vitro*. Saito, S., *et al.*, 1456

TWINS

Twin half-sibs: a research design for genetic epidemiology of common dental disorders. Potter, R.H., 1527

UREASE

pH regulation of urease levels in *Streptococcus salivarius*, Sissons, C.H., *et al.*, 1131

VARNISHES

Critical evaluation of the composition and use of topical fluorides. Stookey, G.K., 805#

Evaluation of the use of professional (operator-applied) topical fluorides, An. Ripa, L.W., 786#

Evaluation of topical fluoride preparations. Mellberg, J.R., 771#

VIRUSES

In vitro virucidal effectiveness of a 0.12%-chlorhexidine gluconate mouthrinse. Bernstein, D., *et al.*, 874

VON EBNER'S GLAND

mRNAs for PRPs, statherin, and histatins in von Ebner's gland tissues. Azen, E.A., *et al.*, 1724

WATER

Influence of water exposure on the tensile strength of composites. Söderholm, K.-J.M. and Roberts, M.J., 1812

Observations on the elastic behavior of a synthetic orthodontic elastomer. Huget, E.F., *et al.*, 496

WOMEN

Taurodontism in 45,x females. Varrela, J., *et al.*, 494

Water-borne fluoride and cortical bone mass: a comparison of two communities. Phipps, K.R. and Burt, B.A., 1256

X CHROMOSOME

Taurodontism in 45,x females. Varrela, J., *et al.*, 494

X-RAYS

Wavelength-independent microradiography: a method for non-destructive quantification of enamel and dentin mineral concentrations using polychromatic x-rays. Herkströter, F.M. and Ten Bosch, J.J., 1522

XYLITOL

24-month clinical study of the incidence and progression of dental caries in relation to consumption of chewing gum containing xylitol in school preventive programs, A. Kandelman, D. and Gagnon, G., 1771

ZINC PHOSPHATE

Influence of test method on failure stress of brittle dental materials. Ban, S. and Anusavice, K.J., 1791
